ISIS Beyond the Spectacle Mehdi Semati 2020-04-02 What is ISIS? A quasi-state? A terrorist group? A movement? An ideology? As ISIS has transformed and mutated, gained and lost territory, horrified the world and been its punch line, media have been central to understanding it. The changing, yet constant, relationship between ISIS and the media, as well as its adversaries' dependency on media to make sense of ISIS, is central to this book. More than just the images of mutilated bodies that garnered ISIS its initial infamy, the book considers an ISIS media world that includes infographics, administrative reports, and various depictions of a post-racial utopia in which justice is swift and candy is bought and sold with its own currency. The book reveals that the efforts of ISIS and its adversaries to communicate and make sense of this world share modes of visual, aesthetic, and journalistic practice and expression. The short tumultuous history of ISIS does not allow for a single approach to understanding its relation to media. Thus, the book's contributions are to be read as contrapuntal analyses that productively connect and disconnect, providing a much-needed complex account of the ISIS-media relationship. This book was originally published as a special issue of *Critical Studies in Media Communication*.

Calendrical Calculations Millennium Edition Edward M. Reingold 2001-08-06 This new edition of the successful calendars book is being published at the turn of the millennium and expands the treatment of the previous edition to new calendars and variants. As interest grows in the impact of seemingly arbitrary calendrical systems upon our daily lives, this book frames the world in a completely algorithmic form. The book gives a description of twenty-five calendars and how they relate to one another: the Gregorian (current civil), ISO (International Organization for Standardization), Egyptian (and nearly identical Armenian), Julian (old civil), Coptic, Ethiopic, Islamic (Moslem), modern Persian (both astronomical and arithmetic forms), Bahá'í (both present and future forms), Hebrew (Jewish), Mayan (long count, haab, and tzolkin), Balinese Pawukon, French Revolutionary (both astronomical and arithmetic forms), Chinese (and nearly identical Japanese), old Hindu (solar and lunisolar), and modern Hindu (solar and lunisolar). Easy conversion among these calendars is a by-product of the approach, as is the determination of secular and religious holidays. Calendrical Calculations makes accurate calendrical algorithms readily available for computer use with LISP, Mathematica, and Java code for all the algorithms included on the CD, and updates are available on the Web. This book will be a valuable resource for working programmers as well as a fount of useful algorithmic tools for computer scientists. In addition, the lay reader will find the historical setting and general calendar descriptions of great interest.

Channeling Moroccanness Becky L. Schulthies 2020-12-01 What does it mean to connect as a people through mass media? This book approaches that question by exploring how Moroccans engage communicative failure as they seek to shape social and political relations in urban Fez. Over the last decade, laments of language and media failure in Fez have focused not just on social relations that used to be and have been lost but also on what ought to be and had yet to be realized. Such laments have transpired in a range of communication channels, from objects such as devotional prayer beads and remote controls; to interactional forms such as storytelling, dress styles, and orthography; to media platforms like television news, religious stations, or WhatsApp group chats. Channeling Moroccanness examines these laments as ways of speaking that created Moroccanness, the feeling of participating in the ongoing formation of Moroccan relationality. Rather than furthering the discourse about Morocco's conflict between liberal secularists and religious conservatives, this ethnography shows the subtle range of ideologies and practices evoked in Fassi homes to calibrate Moroccan sociality and political consciousness.

The Death of a Prophet Stephen J. Shoemaker 2011-11-29 The oldest Islamic biography of Muhammad, written in the mid-eighth century, relates that the prophet died at Medina in 632, while earlier and more numerous Jewish, Christian, Samaritan, and even Islamic sources indicate that Muhammad survived to lead the conquest of Palestine, beginning in 634-35. Although this discrepancy has been known for several decades, Stephen J. Shoemaker here writes the first systematic study of the various traditions. Using methods and perspectives borrowed from biblical studies, Shoemaker concludes that these reports of Muhammad's leadership during the Palestinian invasion likely preserve an early Islamic tradition that was later revised to meet the needs of a changing Islamic self-identity. Muhammad and his followers appear to have expected the world to end in the immediate future, perhaps even in their own lifetimes, Shoemaker contends. When the eschatological Hour failed to arrive on schedule and continued to be deferred to an ever more distant point, the meaning of Muhammad's message and the faith that he established needed to be fundamentally rethought by his early followers. The larger purpose of The Death of a Prophet exceeds the mere possibility of adjusting the date of Muhammad's death by a few years; far more important to Shoemaker are questions about the manner in which Islamic origins should be studied. The difference in the early sources affords an important opening through which to explore the nature of primitive Islam more broadly. Arguing for greater methodological unity between the study of Christian and Islamic origins, Shoemaker emphasizes the potential value of non-Islamic sources for reconstructing the history of formative Islam.

Intercultural Communication for Global Business Elizabeth A. Tuleja 2021-08-30 As concise and practical as ever, this new edition brings together principles and new theories in intercultural communication, focusing on communication as the foundation for management and global leadership. Grounded in the need for building awareness and knowledge, practicing mindfulness, and then working on skill development, this text examines the concepts associated with understanding culture and communication in the global business environment to help readers: understand intercultural communication processes; improve self-awareness and communication in intercultural settings; expand skills in identifying, analyzing, and solving intercultural communication challenges at work; and evaluate whether one's communication has been effective. This fully updated new edition also includes completely updated case studies, with an increased emphasis on non-US perspectives, to show real-world applications across the globe. Richly illustrated with new examples and activities, this text is the ideal companion for any business student or manager dedicated to communicating more effectively in a globalized society.

Indonesian Manuscripts from the Islands of Java, Madura, Bali and Lombok Th. C. van der Meij 2017-07-31 Indonesian Manuscripts from the Islands of Java, Madura, Bali and Lombok is an original, pioneering, and richly illustrated work that discusses hitherto unaddressed features of manuscript traditions of these islands. The extensive description of palm-leaf manuscripts in particular opens up avenues for further study. Unveiling the Time of Jacob's Trouble Deborah Jean Stearn 2014-05-23 Astonishing evidence that pinpoints the timing for Jesus' return. The information in this book demolishes the boundaries and prohibitions of Christian, extrabiblical law. For years we have been led to believe it is sinful to speculate about the time of Jesus' return a result of the misinterpretation of Matthew 24 and Mark 13 by the violation of the Law of Context. However, the secrets of the timing for Jesus' return are actually hidden in the heavens and the biblical feasts, and this book will prove we are indeed admonished to watch for His appearing, and to number our days. In this fascinating Israel-centered and scientific study, you will explore the major calendars of the world only one of which reveals its true age of nearly 6,000 years. That same calendar contains the message of salvation-history in its months, and in its days it mirrors prophetic history from creation week. You will also discover: - The cycles of the heavenly lights are synchronous with prophetic history. - The constellations foretell the first and second comings of Jesus. - Tetrad moon eclipses in history mirrored the birth of Israel in 1948 and Israel's recapture of Jerusalem in 1967. - The tetrad moon eclipses due in 2014/2015 mark the beginning of Daniel's 70th week. - The timetable for the Great Tribulation is built into the Hebrew calendar and feasts. - The significance of the year 6000 on the Gregorian calendar. These are just some of the astounding evidences that all point to the same time for the arrival of Jesus in the year 6000. Unveiling the TIME of Jacob's Trouble is a must read for any serious truth seeker.

Aktuboo: Mastering the Arabic Script Amy Michelle Mosier 2015-09-11 Written from an American perspective, Aktuboo: Mastering the Arabic Script seeks to remove the anxiety of learning not only the Arabic language but its script too. It teaches Modern Standard Arabic, the most ubiquitous dialect in the Middle East. Besides getting you into the Arabic language, it also contains a wealth of cultural information and so it's ideal for Egyptophiles, travelers and Christian missionaries. * Use mnemonics to help you remember the Arabic alphabet. * Practice reading Arabic by first reading English words written in Arabic. * Transition easily from cognates to true Arabic words. * Develop good grammar by examining generic sentences. * Learn how to conjugate at least 50 common verbs. The assistance I had from many Arab people for the translation samples is uncredited. Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Muslim Civil Society and the Politics of Religious Freedom in Turkey Jeremy F. Walton 2017-04-03 The sway of Islam in political life is an unavoidable topic of debate in Turkey today. Secularists, Islamists, and liberals alike understand the Turkish state to be the primary arbiter of Islam's place in Turkey—as the coup attempt of July 2016 and its aftermath have dramatically illustrated. Yet this emphasis on the state ignores the influence of another field of political action in relation to Islam, that of civil society. Based on ethnographic research conducted in Istanbul and Ankara, Muslim Civil Society and the Politics of Religious Freedom in Turkey is Jeremy F. Walton's inquiry into the political and religious practices of contemporary Turkish-Muslim nongovernmental organizations. Since the mid-1980s, Turkey has witnessed an efflorescence of NGOs in tandem with a neoliberal turn in domestic economic policies and electoral politics. One major effect of this neoliberal turn has been the emergence of a vibrant Muslim civil society, which has decentered and transformed the Turkish state's relationship to Islam. Muslim NGOs champion religious freedom as a paramount political ideal and marshal a distinctive, nongovernmental politics of religious freedom to advocate this ideal. Walton's accomplished study offers a fine-grained perspective on this nongovernmental politics of religious freedom and the institutions and communities from which it emerges.

Holy Bible Holy Koran 2 David Alalade 2015-12-05 David Alalade's exploratory sequel to the critically well-received and boldly original non-fiction debut 'Holy Bible Holy Koran: Side By Side', reveals a darker collection of testimonies, commandments, and startling revelations, that aim to remedy and resolve the sinister and dysfunctional qualities of the human spirit. The author returns with his signature bag of stylistic tricks: blending rapid summations and cunning insight, with cool neutrality. Contained within a visual style smartly composed of single paragraphs on facing pages, Biblical on the left, Koranic on the right. The authors brilliant take and viewpoint on comparative religion is slowly gaining a global readership.

Arabic for Nerds Gerald Drissner 2015-10-16 Reading about Arabic grammar is usually as thrilling as reading telephone directories. The author uses a new approach He compiled 270 interesting questions drawing from his years of studies in the Arab world to create a colourful journey into Arabic grammar. However, if you want to reach an advanced level, it is not about learning vocabulary lists - it is about understanding the fascinating core of Arabic. This is what Arabic for Nerds is all about. It is specifically intended for intermediate learners. FULLY REVISED FIRST EDITION - WITH INDEX

Health and Well-Being in Islamic Societies Harold G. Koenig 2014-05-17 From the first hospitals to pioneering pharmacy techniques, the early history of medicine reflects the groundbreaking contributions of Islamic physicians and scientists. Less recognized, however, is the impact of Islam on the health and daily health practices of modern day Muslims. Meticulously documented with current research sources and relevant religious texts, Health and Well-Being in Islamic Societies sheds light on the relationships between Muslim beliefs and physical, psychological, and social health. Background chapters trace Muslim thought on health and healing as it has evolved over the centuries to the present. The authors provide even-handed comparisons with Christianity as the two traditions approach medical and ethical questions, and with Christian populations in terms of health outcomes, assuring coverage that is not only objective but also empirically sound and clinically useful. And as the concluding chapters show, understanding of these similarities and differences can lead to better care for clients, cost-effective services for communities, and healthier Muslim populations in general. Included among the book's topics: Muslim beliefs about health, healing, and healthcare Similarities and differences between Muslim and Christian health beliefs Impact of religion on physical, mental, and community health in Muslims Understanding how Islam influences health Applications for clinical practice Implications for public health Cultural awareness is critical to improving both individual client health and public health on a global scale. Health and Well-Being in Islamic Societies is essential reading for clinical and health psychologists, psychiatrists, social workers, and nurses, and will be informative for the general reader as well.

Unlocking SME Finance in Asia Naoyuki Yoshino 2019-07-01 There is limited access for small and medium-sized enterprises (SMEs) to bank credit. This book proposes new and sustainable models to help ease the access of SMEs to finance and boost economic growth and job creation in Asia. This book looks at the difficulties of SMEs in accessing finance and suggests ways on how to mitigate these challenges. It suggests how we can develop credit information infrastructures for SMEs to remedy the asymmetric information problem and to utilize credit rating techniques for the development of a sustainable credit guarantee scheme. The book provides illustrations of various Asian economies that implemented credit guarantee schemes and credit risk databases and is a useful reference for lessons and policy recommendations.

Experimenting on a Small Planet William W. Hay 2021-09-27 This book is a thorough introduction to climate science and global change. The author is a geologist who has spent much of his life investigating the climate of Earth from a time when it was warm and dinosaurs roamed the land, to today's changing climate. Bill Hay takes you on a journey to understand how the climate system works. He explores how humans are unintentionally conducting a grand uncontrolled experiment which is leading to unanticipated changes. We follow the twisting path of seemingly unrelated discoveries in physics, chemistry, biology, geology, and even mathematics to learn how they led to our present knowledge of how our planet works. He explains why the weather is becoming increasingly chaotic as our planet warms at a rate far faster than at any time in its geologic past. He speculates on possible future outcomes, and suggests that nature itself may make some unexpected course corrections. Although the book is written for the layman with little knowledge of science or mathematics, it includes information from many diverse fields to provide even those actively working in the field of climatology with a broader view of this developing drama. Experimenting on a Small Planet is a must read for anyone having more than a casual interest in global warming and

climate change - one of the most important and challenging issues of our time. This new edition includes actual data from climate science into 2021. Numerous Powerpoint slides can be downloaded to allow lecturers and teachers to more effectively use the book as a basis for climate change education.

Business and Entrepreneurship in Saudi Arabia Edward Burton 2016-09-12 An investor's crucial guide to the changing face of Saudi Arabian business Business and Entrepreneurship in Saudi Arabia is an essential reference guide, informing investors on the key issues that define how business will be done as the nation's family-owned businesses change hands. Business and Entrepreneurship in Saudi Arabia provides essential information investors need to navigate the changing tide of doing business in Saudi Arabia.

Bible versus Quran David Alalade 2015-12-23 This special edition volume unites the author's boldly original and critically well-received Twin Books, 'Holy Bible Holy Koran I and II', to present the author's compelling vision as originally intended, and under its first and formerly rejected title, 'Bible vs Quran'. The two most celebrated books of all time; the Holy Bible and the Noble Quran, are revealed here in a fascinating and undeniably unique point of view. The brilliant delivery of his approach applies a strikingly overt side-by-side perspective of the legendary books and uncovers a collection of testimonies, commandments, and startling revelations, that aim to remedy and resolve the issues that matter most; a from our daily bread, and the people we love, hurt, sex, and murder, to the sinister and dysfunctional qualities of the human condition. This volume also includes a bonus chapter; 'Sympathy For The Samaritan'.

Inclusion in the American Military David E. Rohall 2017-08-04 The U.S. military can be thought of as a microcosm of American society, bringing in people from diverse backgrounds and history to defend one nation. Military leaders must address the same issues and concerns as those found in the civilian world, including exclusion, segregation, and discrimination. In some cases, the military has led the nation by creating policies of inclusion before civilian laws required them to do so. In other cases, the military has lagged behind the larger society. The goal of this book is to provide an overview of the ways in which diversity has been addressed in the military by providing information about particular forms of diversity including race, ethnicity, religion, gender, and sexuality. Subject matter experts provide their insights into the roles that each of these groups have played in the U.S. armed services as well as the laws, rules, and regulations regarding their participation. Ultimately, the authors utilize this information as a way to better understand military diversity and the unique ways that individuals incorporate the military into their sense of identity.

Muslim Pilgrimage in Europe Ingvild Flakerud 2017-07-20 In spite of Islam's long history in Europe and the growing number of Muslims resident in Europe, little research exists on Muslim pilgrimage in Europe. This collection of eleven chapters is the first systematic attempt to fill this lacuna in an emerging research field. Placing the pilgrims' practices and experiences centre stage, scholars from history, anthropology, religious studies, sociology, and art history examine historical and contemporary hajj and non-hajj pilgrimage to sites outside and within Europe. Sources include online travelogues, ethnographic data, biographic information, and material and performative culture.

The interlocutors are European-born Muslims, converts to Islam, and Muslim migrants to Europe, in addition to people who identify themselves with other faiths. Most interlocutors reside in Albania, Bosnia-Herzegovina, Italy, France, the Netherlands, Great Britain, and Norway. This book identifies four courses of developments: Muslims resident in Europe continue to travel to Mecca and Medina, and to visit shrine sites located elsewhere in the Middle East and North Africa. Secondly, there is a revival of pilgrimage to old pilgrimage sites in South-eastern Europe. Thirdly, new Muslim pilgrimage sites and practices are being established in Western Europe. Fourthly, Muslims visit long-established Christian pilgrimage sites in Europe. These practices point to processes of continuity, revitalization, and innovation in the practice of Muslim pilgrimage in Europe. Linked to changing sectarian, political, and economic circumstances, pilgrimage sites are dynamic places of intra-religious as well as inter-religious conflict and collaboration, while pilgrimage experiences in multiple ways also transform the individual and affect the home-community.

Toward a Global Middle Ages Bryan C. Keene 2019-09-03 This important and overdue book examines illuminated manuscripts and other book arts of the Global Middle Ages. Illuminated manuscripts and illustrated or decorated books—like today's museums—preserve a rich array of information about how premodern peoples conceived of and perceived the world, its many cultures, and everyone's place in it. Often a Eurocentric field of study, manuscripts are prisms through which we can glimpse the interconnected global history of humanity. Toward a Global Middle Ages is the first publication to examine decorated books produced across the globe during the period traditionally known as medieval. Through essays and case studies, the volume's multidisciplinary contributors expand the historiography, chronology, and geography of manuscript studies to embrace a diversity of objects, individuals, narratives, and materials from Africa, Asia, Australasia, and the Americas—an approach that both engages with and contributes to the emerging field of scholarly inquiry known as the Global Middle Ages. Featuring 160 color illustrations, this wide-ranging and provocative collection is intended for all who are interested in engaging in a dialogue about how books and other textual objects contributed to world-making strategies from about 400 to 1600.

Islamic Heritage Architecture and Art I G Passerini 2018-07-18 Papers presented at the 2nd International Conference on Islamic Heritage Architecture and Art are contained in this volume. The conference attracted important research highlighting the significance of Islamic heritage architecture and art to the world and its influence across different regions. The papers deal with the design of many types of buildings in Islamic countries, including not only the better known public buildings like mosques, mausolea, citadels and forts, but also houses and gardens, engineering works such as bridges and dams, irrigation systems and many others which have also had a profound impact on society. Traditional architecture and urban environment in most Islamic countries is now being eroded by overemphasis on a global type of architecture and city planning. As a consequence, many regions are losing their identity. The included studies review these developments in the light of what classical Islamic urban design and architecture has to offer modern society. Research contained in this book provides an analysis of the materials employed and the types of structural elements used, particularly those unique to Islamic architecture. Associated topics covered include music, textiles and ceramics, which are essential parts of the architectural fabric. Also looked at are construction materials, including not only stone and brick but also more perishable materials like adobe, wood and reeds. The preservation of heritage features also requires the development of appropriate conservation techniques in response to the different materials used and the ways structural forms work, including under extreme conditions, such as earthquakes. Academics, researchers, practitioners and government employees actively involved in the topic of Islamic heritage architecture and art will find this publication of interest.

The Weekly Khatbah Volume 3: 2015-2016 Saiyan Islam 2017-12-30 Every week Friday comes and for us Muslims, Friday is very crucial in the sense we have our Jummah prayers. Along with the Jummah prayers we have our weekly sermons. What happens is that most of us tend to forget the sermons delivered by the Imams. So I thought of this system of writing down all the sermons so that the knowledge we gain gets preserved. Furthermore the sisters who are mostly unable to attend the Jummah prayer in many countries do not get the chance to learn from the weekly sermons. The males can easily record their learning and teach the women at their home. All the sermons are from the Imams from the Masjids I attend weekly and the Hadiths mentioned are from their own sermons. Sometimes the Imams may tend to refer to weak Hadiths, I have tried my best to classify them as much as possible. May Allah have mercy upon us all and may we get guided to the Straight Path, Ameen.

Coconut Robin Laurance 2019-07-01 Coconuts have been around for longer than Homo sapiens; they have been turned into art, taken part in religious rituals and been a sign of wealth and success. They have saved lives, not only by providing nourishment, but also as part of the charcoal filters in First World War gas masks. It was coconuts that triggered the mutiny on the Bounty, and coconuts that saved the life of the man who went on to become the 35th President of the United States. The coconut has long been the unseen player in the endeavours of industrialists and bomb makers, physicians and silversmiths, smugglers and snake charmers. To this day, coconuts shape the lives of people around the world. At a time when coconut products crowd the shelves of supermarkets, health food shops and beauty salons, Robin Laurance looks beyond the oils and health drinks to uncover the unexpected, often surprising, and vital roles played by the coconut palm and its nut in times past and present.

The Global Transformation of Time Vanessa Ogle 2015-10-12 As railways, steamships, and telegraph communications brought distant places into unprecedented proximity, previously minor discrepancies in local time-telling became a global problem. Vanessa Ogle's chronicle of the struggle to standardize clock times and calendars from 1870 to 1950 highlights the many hurdles that proponents of uniformity faced.

Minors' Crimes in Saudi Arabia Hajed A. Alotabi 2020-01-24 This book investigates a number of thematic problems related to the Saudi Arabian juvenile detention system. These issues concern the lack of codification and consolidation, an unclear determination of the age of puberty, the misclassification of juveniles' crimes, and gross inconsistency in the penalties meted out. This study employs a mixed methodology involving both analytical and statistical approaches to the problem. It examines judicial applications from three courts in Riyadh to clarify the traditional classification for juveniles' crimes (namely, Hudud, Qisas and Ta'zir crimes).
