Cobalt Cover-Up Lance Cooper 2020-02-25 Following a deadly car crash, small-town lawyer Lance Cooper risked everything to battle one of the most powerful auto corporations in the world to get justice for a young woman. A fast-paced, journalistic account of tragedy turned to triumph, despair to hope, Cobalt Cover-Up is an inspirational, thoroughly compelling, and victorious read. In the midst of his own family struggles, small-town Georgia lawyer Lance Cooper agreed to defend Ken and Beth Melton and investigate the deadly accident that killed their daughter Brooke after she inexplicably lost control of her Chevy Cobalt. But what started as a heartbreaking yet all too common lawsuit quickly escalated into a David vs. Goliath case when Cooper discovered shocking evidence that General Motors concealed an ignition switch defect for nearly a decade--resulting in 124 deaths, including Brooke's, and risking the lives of millions more. Despite GM's settlement offers and attempts to bury evidence, Cooper refused to back down and worked tirelessly to expose the truth. Locked in a tenacious legal fight, Cooper and the Meltons faced incredible odds--Ken and Beth losing jobs and suffering the difficulty of grieving a beloved daughter during a court battle, Cooper risking his reputation and private practice against the overwhelming opposition from GM's team of lawyers, and both parties facing massive financial strain. Yet, in the relentless pursuit for justice and to protect future innocent lives, this small-town lawyer and a working-class American couple stared down the biggest US auto manufacturing mogul and ultimately transformed the entire industry.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive--even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting--with lessons that go down easy. You'll be laughing and learning at the same time.
