Maritime Boundary Delimitation: The Case Law Alex G. Oude Elferink 2018-03-15 The law of maritime delimitation has been mostly developed through the case law of the International Court of Justice and other tribunals. In the past decade there have been a number of cases that raise questions about the consistency and predictability of the jurisprudence concerning this sub-field of international law. This book investigates these questions through a systematical review of the case law on the delimitation of the continental shelf and the exclusive economic zone. Comprehensive coverage allows for conclusions to be drawn about the case law's approach to the applicable law and its application to the individual case. **Maritime Boundary Delimitation: The Case Law** will appeal to scholars of international dispute settlement as well as practitioners and academics interested in the law concerning the delimitation of maritime boundaries.

Contemporary Issues in International Law B.C. Nirmal 2018-02-13 This book explores the changing nature of international law and its ability to respond to the contemporary issues related to international environment, trade and information technology. The evolution of international law has reached a stage where we are witnessing diminishing power of the state and its capacity to deal with the economic matters challenging the existing notions of territory and sovereignty. Recent trends in international law and international relations show that states no longer have exclusive control over the decision-making process at the global level. Keeping this in mind, the book brings together the perspectives of various international and national scholars. The book considers diverse issues such as, sustainable development, climate change, global warming, Rio+20, technology transfer, agro-biodiversity and genetic resource, authority for protection of environment, human right to water, globalization, human rights, sui generis options in IP laws, impact of liberalization on higher education, regulation of international trade, intellectual property rights, collective administration of copyright, broadcast reproduction rights, implementation of copyright law, communication rights under copyright law, arbitration for IP disputes, doctrine of exhaustion of rights, trans-border reputation of trademark, information as an asset, cyber obscenity and pornography, e-governance, taxation of e-commerce, computer crime, information technology, domain names, research excellence in legal education, ideological perspective on legal education, challenges for law teachers, and clinical legal education. The topics, though diverse, are closely interrelated, with the common concern throughout being that the global environment, international trade, information technology and legal education need appropriate national normative and institutional responses as well as the global cooperation of members of the international community. Presenting reflections of a number of Asian, African and European scholars on these varied facets, the book is of great value to scholars, practitioners, teachers and students associated with contemporary international law.

International Courts and the Development of International Law Nerina Boschiero 2013-03-15 This book contains a collection of essays by leading experts linked to the outstanding characteristics of the scholar in honour of whom it is published, Tullio Treves, who combines his academic background with his practical experiences of a negotiator of international treaties and a judge of an international tribunal. It covers international public and private law related to international courts and the development of international law. Under Article 38 of its Statute, the International Court of Justice can apply judicial decisions only as a "subsidiary means for the determination of rules of law". However, there are many reasons to believe that international courts and tribunals do play quite an important role in the progressive development of international law. There are a number of decisions which are inevitably recalled as the first step, or a decisive step, in the process of the formation of a new rule of customary international law. In these cases, can the judge be considered as a subsidiary of others? Are these cases compatible with the common belief that a judge cannot create law? Is this a peculiarity of international law, which is characterized by the existence of several courts but the lack of a legislator? Do decisions by different courts lead to the consequence of a fragmented international law? This volume provides the reader with an elaboration of various questions linked to the legislative role of courts. In their choices of subjects, some contributors have taken into account the general aspects of the development of international rules through court decisions or specific sectors of international law, such as human rights, international crimes, international economic law, environmental law and the law of the sea. Others have chosen the subject of the rules on jurisdiction and procedure of international courts. The question of the courts' role in the development of areas of law different from public international law, namely private international law and European Union law, has also been considered. The information and views contained in this book will be of great value to academics, students, judges, practitioners and all others interested in the public and private international law aspects of the link between international courts and the development of international law.

Due Diligence in the International Legal Order Heike Krieger 2021-02-03 This book provides a comprehensive analysis of the content, scope, and function of due diligence across various areas of international law. Looking at current tendencies towards proceduralisation and more proactive risk management, it reveals the promises and limits of due diligence as a concept for enhancing accountability and compliance.

Recent Developments in International Law James Wilford Garner 2025

The Belt and Road Initiative and the Law of the Sea Keyuan Zou 2020-03-02 The Belt and Road Initiative and the Law of the Sea offers insightful discussions on the use of oceans in the context of the Belt and Road Initiative covering navigational safety, marine energy and sea ports, maritime law enforcement and access of landlocked states to the sea.

Maritime Delimitation as a Judicial Process Massimo Lando 2019-06-06 The first study of the three-stage approach to maritime delimitation, collating methods from judicial decisions, treaties and scholarship.

Contemporary Issues on Public International and Comparative Law Chima Centus Nweze 2009 The book explores the broad range of legal, personal, social, political and historical foundations of international law. The book is a collective effort of qualified authors- law school deans and professors, national and international court judges, young and old international law scholars and government lawyers from varying legal cultures across the oceans of the world, representing diverse legal philosophical and corresponding practices bringing their stories to life, telling tales helpful for those well-acquainted with the issues. Although one book of Liber Amicorum cannot address all the important issues in the vast arena of international law, these essays provide a rich and lucid understanding of issues of modern public international and comparative law. The beauty of the book lies in the fact that the issues discussed in the compendium by the diverse authors though familiar to comparatists, are given perspectives different from the usual Euro-American centrist standpoint that dominated the current writings in international law. The collected essays will be found most useful as an informative tool in the discovery of progressive development of international law as well as in the study of comparative legal systems. *** The legal essays contained in this treatise on various important issues of public international and comparative law are interesting, well researched, and written from multi-disciplinary perspectives by very well-qualified legal scholars from different backgrounds and cultures of the world. All the authors are exceptionally knowledgeable and experts in their chosen fields. It is strongly urged that people should read these essays in order to fully appreciate the contributions of international legal scholars to world peace, international development, understanding and progress. Nothing can be more befitting in honoring Professor Dr. Christian Nwachukwu Okeke for his enormous contributions to the positive development of the legal academy nationally and internationally. Professor Dr. Emmanuel Omoh Esiemokhai Ph.D., Academic Chancellor, Bosas International Law Bureau, Abuja, Nigeria Chima Nweze's Contemporary Issues on Public International and Comparative Law: Essays in Honor of Professor Christian Nwachukwu Okeke, is a magisterial work of enormous scope and depth that brings together a diverse group of internationally distinguished authors from academia, government and private practice. The Liber Amicorum is impressive both in range of subject matter and quality of analysis and merits the attention of scholars and global policy makers. Ndiva Kofele Kale, Ph.D., J.D., Professor of Law, Southern Methodist University, Dedman School of Law, Dallas, Texas Professor C.N. Okeke is a very fine scholar in international law. He has taught the subject in Universities in Africa, Europe and the United States. In all these continents, he has made tremendous impact on students of the subject. I regard the essays as a useful epilogue to his successful career as a teacher and researcher of international law. I heartily recommend the essays to all that are interested in the study of international law. I have no doubt in my mind that the essays will provide a useful addition to the growing literature in international law. I commend the contributors for a worthy compendium.

Recueil Des Cours, 1989-IV Académie de droit international de La Haye 1990-11-01 The Academy is an institution for the study & teaching of public & private international law & related subjects. Its purpose is to encourage a thorough & impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical & practical aspects of the subject, including legislation & case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law. This volume contains: Reform, but not Revolution. General Course on Private International Law, by Peter M. NORTH Questions de droit international prive et dommages catastrophiques, par Tito BALLARINO.

Development and Developing International and European Law Konrad Ginther 1999 This book contains more than 40 contributions from academics, specialists and practitioners in International and European law as well as transnational constitutional law. The articles focus on recent developments in these fields and in particular on legal aspects of development. The book is dedicated to Konrad Ginther whose own academic research and work have always been devoted to new developments in international law and the shift of legal paradigms at universal and regional levels. International law in transformation and the right to (sustainable) development as a legal principle have been important aspects of his work. The contributions of his colleagues, friends and scholars, published in honour of his 65th birthday, reflect the interplay of theory, dogmatics and the practice of development in international, European and national

constitutional law.

Remedies before the International Court of Justice Victor Stoica 2021-02-28 Understanding exactly how the International Court of Justice applies the remedies of international law is vital in order to determine its prioritisation of remedies and its rationales for resolving inter-state disputes. This analysis also shows whether the framework of remedies of international law, designed by the International Law Commission through the Articles on Responsibility of States for Internationally Wrongful Acts, is strictly observed by the International Court of Justice. This is among the few systemic studies in the field of remedies, contrasting the theoretical controversies with a complete survey of the large set of requests that have been submitted before the ICJ. International lawyers, agents of states and diplomats will be able to identify the relevant case-law for each remedy in order to frame more effective requests to the Court. This study will also be of interest to researchers, practitioners, judges, policymakers, and graduate students.

Contemporary Issues in International Environmental Law M. Fitzmaurice 2009-01-01 . . . Highly recommended as a key contribution to the literature. It fulfils its title in being contemporaneous, but more than that it also provides a subtle critique of how many international environmental lawyers have approached their subject. . . this book will be an essential read for anyone interested in the subject. British Yearbook of International Law This book presents an interesting, scholarly read. . . an invaluable reference asset, to law students, researchers, policy makers and non-state actors with interest in environmental regulation and governance. Priscilla Schwartz, Journal of Environmental Law This is a thoughtful and well-researched study of current issues in international environmental law. Malgosia Fitzmaurice's collection of essays is a welcome addition to the literature in this rapidly developing area of the law: it provides perspective on the environmental law issues discussed, but always against the background of the broader concepts and principles of general international law. James Crawford, University of Cambridge, UK The central aim of this insightful book is to illuminate how many concepts in international environmental law such as the precautionary principle and sustainable development are taken for granted. These problematic issues are very much still evolving and subject to heated debate between scholars as well as between states. The author explores these controversies viewing them as a positive development within a field that is in a constant state of flux. Areas discussed include the convergence of human rights with environmental issues and the quest for the human right to a clean environment. The book also clearly demonstrates that international environmental law cannot be analysed in isolation since it greatly influences the development of general international law. Taking full account of the most recent decisions of international courts and tribunals as well as the most up-to-date scholarly analysis, Contemporary Issues in International Environmental Law is a timely and important resource for legal scholars, under- and post-graduates and practitioners alike.

Netherlands Yearbook of International Law 2012 Janne Elisabeth Nijman 2013-06-12 The Netherlands Yearbook of International Law (NYIL) was first published in 1970. It offers a forum for the publication of scholarly articles of a more general nature in the area of public international law including the law of the European Union. With this volume on 'Legal Equality and the International Rule of Law', the Netherlands Yearbook of International Law celebrates Pieter Kooijmans' academic, diplomatic, and judicial career by picking up on an important subject in his early writings, the principle of legal equality of states. This volume studies if and how the principle of legal equality of states is still important in the international legal order of the early 21st century. In particular, this volume examines the principle's current relevance, e.g., in a pluralistic legal order, its relation to hegemony in international relations and international law, and how it functions in contemporary international organisations. The principle is further explored in the fields of international criminal law, international humanitarian law, and the international law of sovereign immunity.

Contemporary Developments in International Law Rüdiger Wolfrum 2015-12-04 The Liber Amicorum Budislav Vukas offers essays on current issues of international law, primarily concerning the subjects of international law, the law of the sea, human rights law, including minorities' protection, and dispute settlement.

Legal Sources in Business and Human Rights Martina Buscemi 2020-06-02 Legal Sources in Business and Human Rights takes stock of different aspects of Business and Human Rights practice in order to identify and explore some dynamics that are driving the evolution of the legal sources of international and EU law in the field of B&HRs.

Predictability and Flexibility in the Law of Maritime Delimitation Yoshifumi Tanaka 2019-11-14 This fully revised new edition offers a comprehensive picture of the law of maritime delimitation, incorporating all new cases and State practice in this field. As with all types of law, the law of maritime delimitation should possess a degree of predictability. On the other hand, as maritime delimitation cases differ, flexible considerations of geographical and non-geographical factors are also required in order to achieve equitable results. How, then, is it possible to ensure predictability while taking into account a number of diverse factors in order to achieve an equitable result? This is the question at the heart of the law of maritime delimitation. This book explores a well-balanced legal framework that reconciles predictability and flexibility in the law of maritime delimitation by looking at three aspects of the question: first it reviews the evolution of the law of maritime delimitation; second, it undertakes a comparative study of the case law and State practice; and third, it critically assesses the law of maritime delimitation in its current form.

The Gabikovo-Nagymaros Judgment and Its Contribution to the Development of International Law Serena Forlati 2020-05-18 The Gabikovo-Nagymaros Judgment and its Contribution to the Development of International Law deconstructs one of the most influential ICJ Judgments and analyses its contributions to the law of treaties, the law of international responsibility, and the law of sustainable development in light of 20 years of subsequent developments in the international legal order.

The International Legal Order: Current Needs and Possible Responses James Crawford 2017-04-03 This volume of essays addresses some of the most significant issues of contemporary international law. It particularly focuses on questions relating to international humanitarian law, the law of the sea, human rights, the use of force, international environmental law, and the settlement of international disputes. Recent developments in some other issues of international law such as State immunity and State responsibility are also dealt with. The Work contains a number of articles in French and is offered as a tribute to the prominent Iranian Professor of International Law, Djamchid Montaz, on the occasion of his 75th birthday.

International Economic Law and Governance Julien Chaisse 2016-07-21 Nation states have long and successfully claimed to be the proper and sovereign forum for determining a country's international economic policies. Increasingly, however, supranational and non-governmental actors are moving to the front of the stage. New forms of multilateral and global policy-making have emerged, including states and national administrations, key international organizations, international conferences, multinational enterprises, and a wide range of transnational pressure groups and NGOs that all claim their share in exercising power and influence on international and domestic policy-making. In honour of Professor Mitsuo Matsushita's intellectual contributions to the field of international economic law, this volume reflects on the current state and the future of international economic law. The book addresses a broad spectrum of themes in contemporary international economic regulations and focuses specifically on the significant areas of Professor Matsushita's scholarship, including the rise of the soft-law mechanism in international economic regulation, the role of the WTO and dispute settlement, and specific areas such as competition, subsidies, anti-dumping, intellectual property, and natural resources. Part one of the volume provides a comprehensive and critical analysis of the rule-based international dispute settlement mechanisms; Part two investigates the normative influences to and from WTO law; and Part three focuses on policy and law-making issues.

Global Challenges and the Law of the Sea Marta Chantal Ribeiro 2020-05-23 This book analyses a selection of challenges in the implementation and application of the 1982 UN Convention on the Law of the Sea (UNCLOS), focusing on several areas: international organizations, fisheries, security, preserving marine biodiversity, dispute settlement, and interaction with other areas of international law. UNCLOS has been described as the Constitution for the Oceans. It sets out the fundamental rights, obligations and jurisdictions of States regarding the access to, uses and management of the oceans and seas and their resources. It balances States' diverse and sometimes conflicting interests, such as conflicting uses of space, against navigational interests and the protection of the marine environment. UNCLOS is the first global treaty to include comprehensive obligations on the protection and preservation of the marine environment, including the conservation of living marine resources. These are often common or cross-border challenges, which can only be addressed through international cooperation. The book is divided into three thematic parts. The first concerns the role of international organizations in ocean governance. It includes twelve chapters covering a very diverse set of issues, both materially and geographically, that demonstrate the importance of coordinated actions on the part of multiple States for obtaining harmonized solutions regarding the pursuit of activities in maritime spaces (in connection with e.g. navigation, fisheries or maritime security). The second part concerns the relevance of dispute settlement mechanisms for understanding the international law of the sea and the international legal framework within which the actions of the great maritime powers take place. It is composed of three chapters, examining stakeholders' role in dispute settlement, the position taken by China and the Russian Federation regarding international litigation in maritime spaces, and how the South China Sea Award may be relevant to the debate on the international legal concepts of rock and island. In turn, the third part addresses current discussions on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction. Its seven chapters report on the status quo of the ongoing negotiations for a new international legal regime of the high seas, and the establishment and operationalization of environmental regimes for international maritime spaces.

A History of Political Theories. Recent Times: Essays on Contemporary Developments in Political Theory Charles Edward Merriam 1924 Contributed by the students of the late William Archibald Dunning.

The Role of Law in International Politics Michael Byers 2001 This interdisciplinary volume examines the highly topical issue of the role international law plays in international politics today.

Furthering the Frontiers of International Law: Sovereignty, Human Rights, Sustainable Development Niels M. Blokker 2021-07-19 This rich collection focuses on the broad research interests of Professor Nico Schrijver, in whose honour it was created. Written by a wide range of international scholars affiliated with Leiden University's Grotius Centre for International Legal Studies, the essays reflect Professor Schrijver's important contribution to academia and practice, particularly in the fields of sovereignty, human rights and sustainable development. The authors aim to reflect on changes in international law and on new developments in the diverse fields they explore. "Furthering frontiers" is the research theme of the Grotius Centre. Its exploration in this thought-provoking volume is a fitting homage to Nico Schrijver's achievements on the occasion of his retirement as Chair of Public International Law of Leiden University.

Solidarity and Community Interests R. Wolfrum 2021-12-28 Solidarity and community interest may appear to be purely abstract notions. But in fact they may form the basis of a more flexible approach to international lawmaking than traditional formulas of legally binding commitments. Through an empirical analysis of existing and emerging public international law, this book traces these concepts in existing regimes and investigates the impact they have had and will continue to have on the progressive development of specific international regimes, particularly those serving the protection of the environment and of human rights. It discusses how through these two regimes these concepts have changed the international normative order and explores the challenges such changes have created for implementation and enforcement. One such challenge is the lack of an adequate dispute settlement regime, and the book closes with some practical suggestions for an appropriate mechanism.

The structure and process of international law Ronald St John MacDonald 1983-10-17

The Diversity of International Law Aristotle Constantinides 2009-09-25 This collection of essays in honour of Kalliopi K. Koufa, the first woman to become Professor of International Law in Greece, brings to light the multiple faces, the expanding scope and diversity of international law.

Defenses in Contemporary International Criminal Law Geert-Jan G. J. Knoops 2008 The Second Edition of "Defenses in Contemporary International Criminal Law" ventures farther into this uneasy territory than any previous work, offering a meticulous analysis of the case law in the post World War II Military Tribunals and the ad hoc tribunals for Rwanda and the Former Yugoslavia, with particular attention to the defenses developed, their rationales, and their origins in various municipal systems. It analyzes the defense provisions in the charters and statutes underlying these tribunals and the new International Criminal Court, while examining the first judgment in this field rendered by the Special Court for Sierra Leone, on June 20, 2007. The conceptual reach of this work includes not only the defenses recognized in the field's jurisprudence and scholarship (superior orders, duress, self-defense, insanity, necessity, mistake of law

and fact, immunity of States), but also presents a strong case for the incorporation of genetic and neurobiological data into the functioning of certain defenses. Procedural mechanisms to invoke these defenses are also addressed.

The International Legal Régime for the Protection of the Stratospheric Ozone Layer O. Yoshida 2001-04-18 The first edition of Professor Yoshida's monograph, *The International Legal Régime for the Protection of the Stratosphere Ozone Layer*, has been the most comprehensive contemporary study of the international ozone régime. In the second revised edition, he analyses important developments of the ozone treaty régime.

International Development Law Petra Minnerop 2019 This volume brings together articles on international development law from the Max Planck Encyclopedia of Public International Law, the definitive reference work on international law. It provides an invaluable resource for scholars, students, and practitioners of international development law, giving an accessible, thorough overview of all aspects of the field. Each article contains cross-references to related articles, and includes a carefully selected bibliography of the most important writings and primary materials as a guide to further reading. The Encyclopedia can be used by a wide range of readers. Experienced scholars and practitioners will find a wealth of information on areas that they do not already know well as well as in-depth treatments on every aspect of their specialist topics. Articles can also be set as readings for students on taught courses.

International Law and Sustainable Development Deputy General Counsel Advisory Services Legal Vice Presidency David Freestone 1999 Written by judges of the International Court of Justice and the International Tribunal for the Law of the Sea and other leading experts, this collection of essays deals with the most recent developments in international environmental law since 1992.

Modern Law of the Sea David Anderson 2008 These collected essays examine different aspects of the modern law of the sea. They address many key provisions in the United Convention on the Law of the Sea, including its historical development, the substantive rules governing navigation, resources, the regime of the high seas, maritime jurisdiction, the protection of the marine environment and the delimitation of maritime boundaries, as well as the settlement of disputes. The essays also review the Implementation Agreement of 1994 concerning deep seabed mining and the Implementation Agreement of 1995 concerning Straddling and Highly Migratory Fish Stocks. The author presents purely personal views on many negotiations and cases in which he participated. The essays, written between 1988 and 2006, will be of interest to everyone involved in the law of the sea. Davis Anderson is a former legal adviser to the Foreign and Commonwealth Office (1960-1996) and judge of the International Tribunal for the Law of the Sea (1996-2005).

Merrills' International Dispute Settlement John Merrills 2022-02-28 The fully revised seventh edition of this successful textbook explains the legal and diplomatic methods and organisations used to solve international disputes, how they work and when they are used. It looks at diplomatic (negotiation, mediation, inquiry and conciliation) and legal methods (arbitration, judicial settlement). It uses many, up-to-date examples of each method in practice to place the theory of how the law works in real-life situations, demonstrating the strengths and weaknesses of different methods when they are used. Fully updated throughout, the seventh edition includes a new introduction explaining the common principles of settlement and a chapter on investor-state arbitration, as well as recommended further readings at the end of each chapter. It is an essential resource for advanced undergraduate and postgraduate courses on international dispute settlement.

Due Diligence Obligations in International Law Alice Ollino 2022-02-28 This book discusses the conceptual foundations of due diligence obligations and their normative function in the law of international responsibility.
