The Night of Broken Glass Lisa Gerhardt 2021-09-11 November 9th 1938 is widely seen as a violent turning point in Nazi Germany's assault on the Jews. An estimated 400 Jews lost their lives in the anti-Semitic pogrom, more than 30,000 were imprisoned or sent to concentration camps, where many were brutally mistreated. Thousands more fled their homelands in Germany and Austria, shocked by what they had seen, heard and experienced. What they took with them was not only the pain of saying farewell but also the memory of the scenes: attacks by mobs of drunken Nazis, public humiliations, burning synagogues, inhuman conditions.

overcrowded prison cells and concentration camp barracks. The reactions of neighbours and passersby to the barbarities ranged from sympathy and aid to scorn, mockery, and abuse. In 1939 the Harvard sociologist Philip Hartshorne gathered eyewitness accounts of the Kristallnacht from hundreds of Jews who had fled, but Hartshorne joined the Secret Service shortly afterwards and the accounts he gathered were forgotten. These eyewitness testimonies – published here for the first time with a Foreword by Saul Friedländer, Prize-winning historian and Holocaust survivor – paint a harrowing picture of everyday violence in one of Europe's darkest moments. This unique and disturbing document will be of great interest to anyone interested in history, Nazi Germany and the historical experience of the Jews.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your perspective about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're a parent, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments: from bribing his kids to do math (since studies show conditional cash transfers improved educational outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows that kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because studies show that family size means smarter kids). Conley encourages parents to draw on the latest data to rear children, if only to that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are about love, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his parenting. *Parentology* teaches you everything you need to know about the latest literature on parenting—with a little humor thrown in for good measure. You'll be laughing and learning at the same time.

The Immortal Life of Henrietta Lacks Rebecca Skloot 2010-02-02 #1 NEW YORK TIMES BESTSELLER • "The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly."—*Entertainment Weekly* NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE "MOST INFLUENTIAL" (CNN), "DEFINING" (LITHUB), AND "BEST" (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE

HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • The Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor South Carolina tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were used in developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped make important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold for billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family didn’t learn of her “immortality” until more than twenty years after her death, when scientists investigating the use of her cells using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca Skloot became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was constantly asking questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother’s cells were so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Going Solo
Roald Dahl 2012-02-02 In *Going Solo*, the world's favourite storyteller, Roald Dahl, tells of his experiences as a fighter pilot in Africa. 'They did not think for one moment that they would find anything but a burnt-out engine and a charred skeleton, and they were astounded when they came upon my still-breathing body lying nearby.' In 1938 Roald Dahl was fresh out of school and bound for his first job in Africa, hoping to find adventure far from home. However, he got far more excitement than he bargained for when the outbreak of the Second World War led him to join the RAF. His account of his experiences in Africa, crashing a plane in the Western Desert, rescue and recovery from his horrific injuries in Alexandria, flying a Hurricane as Greece fell to the Germans, and many other daring deeds, recreates a world as bizarre and unnerving as any he wrote about in fiction. 'Very nearly as grotesque as his fiction. The same compulsive blend of wide-eyed innocence and fascination with danger and horror' Evening Standard 'A non-stop demonstration of expert raconteurs' New York Times Book Review Roald Dahl, the brilliant and worldwide acclaimed author of *Charlie and the Chocolate Factory*, *James and the Giant Peach*, *Matilda*, and many more classics for children, also wrote dozens of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, *Roald Dahl's Twisted Tales* by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.
