Rubber Powered Model Airplanes Don H. Ross 1988 This comprehensive manual covers rubber powered model airplanes from a beginner's simple trainer through gradually more complex designs, including winning scale and duration fliers. Even if you've never built a model, the simple line drawings and detailed photos give you the tools and techniques to build light, sturdy models that will surprise and delight you with their sustained flights. Some Important Topics Covered Include... -Plans for two all-sheet balsa models that can be built in hours and are capable of flights exceeding one minute indoors or out. -Plans for stick and tissue models that gradually introduce the builder to more complex projects. -Many techniques that can be used to simplify construction, add strength, and reduce weight. -Propeller construction and design simplified so every novice can build and even design contest winning props. -The secrets of flight trimming as the experts do it. -Numerous ideas on how to add terrific scale details. -The ABC's of how to design your own models including Canards, Bi-planes, and Flying Wings. It's all here...the models, materials, and methods. Learn how to work with the various materials and adhesives and how to choose the right ones for every type of model. This book shows you the difference between kits and "scratch building," and how to modify any kit for better endurance and appearance. Don started building models in 1942. His designs have appeared in magazines and his "Fledgling" classes have added scores of young and "retread" modelers to the active scene. Don specializes in "synthesizing" difficult technical information into simple, straightforward how-to basics that make experts out of rank beginners. Rubber Powered Model Airplanes takes the "mystery" out of building successful free flight models. Whether you're thinking of building a kit, or considering an original design; whether you build for fun or competition...this book's for you! "THE book I would recommend to anyone, of any age, starting out in free flight." -National Free Flight Digest "A tool to bring aeromodelling to the public." -Flying Models Magazine "Universal. Good value for the bookshelf." -Aero Modeller Magazine

Building and Flying Model Aircraft Robert Schleicher 2012-01-27 Richly illustrated manual introduces beginners to basic aerodynamic principles and all aspects of model-building — from paint and tissue covering to radio-control flying.

RCAdvisor's Model Airplane Design Made Easy Carlos Reyes 2009-01-01 Build and fly your very own model airplane design. Using clear explanations, you will learn about important design trade-offs and how to choose among them. The latest research and techniques are discussed using easy to understand language. You will discover: The special challenges faced by the smaller models and how to overcome them. How to choose the right material for each part of the airplane. Easy rules for selecting the right power system, gas or electric. When it makes sense to use one of the innovative Kfm airfoils. Pros and cons of canard and multi-wing configurations. A step-by-step design process that includes good setting and flight testing. In-depth discussions of important topics like airfoils and wing design. The sources of air drag and how to minimize their impact. ADVANCE PRAISE "This book is a joy to read! The writing style and wit add dimension in a way that is rarely found in today's reference materials. If someone has considered designing their own airplane and been put off because of complicated formulas, vocabulary and reference style that would bore even an engineer, this will convince them to go ahead and try it. Written with real people in mind and not engineers - and I mean that in a good way. This is a book that will reside along the other favorites on my bookshelf. Carlos really managed to produce a book that will last a long time and become one of the standards for modelers." - Greg Gimlick, Electric columnist, Model Aviation magazine "RCAdvisor's Model Airplane Design Made Easy is the ultimate model airplane design book for both beginning and experienced modelers." - Richard Kline, Inventor, Kfm airfoils "RCAdvisor's Model Airplane Design Made Easy is a real contribution to the world's literature on the subject. It provides an excellent bridge between full scale aviation and aeromodelling, showing the relationship between the two, for better understanding of the differences and similarities which should be applied for good model performance. While thorough in detail, the book is also easily readable so that the information is simple to understand. It is a very good combination of theory and practical application. Nicely illustrated, the book is also full of common sense explanations and references to other sources of information." - John Worth, former President and Executive Director of the AMA "Carlos Reyes personally leads the reader through some basic aerodynamics, materials considerations, electric power system planning and a practical application of theory as it is applied to a finished flying model. The background history of various types of aircraft shows the development of aviation and how it relates to the models that we build and fly today, as well as how models have influenced general aviation. It is always exciting to find some 'new to me' concepts and theories, and there were several in this well-written narrative." - Ken Myers, Editor, Ampeer electric flight newsletter "No matter how long you've been aeromodelling, or what your interests are in our great hobby, the greatest thrill of all is standing behind a unique model that you've designed and built yourself, from a blank sheet of paper - or even a blank CAD file - and preparing to make that first take off. So sit yourself down in a comfy chair, read RCAdvisor's Model Airplane Design Made Easy and set off on aeromodelling's greatest adventure. Let Carlos Reyes - an aeromodeller of long standing and great talent - take you through the mysteries of how to arrive at the point that every lover of model aircraft should experience." - Dereck Woodward, aeromodeller, designer and magazine writer for the past fifty years
