Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

INNOCENTI LAMBRETTA Vittorio Tessera 2008-02 The Lambretta was one of the most popular forms of transportation of the 50s and 60s and, together with the Vespa, it monopolized the Italian scooter market, and knew how to sell itself in the international market with its own original technical characteristics and exceptionally modern frame. This long awaited new edition provides new detailed appendices and specifications for all the models covered, helping collectors in the identification and restoration of their Lambretta.

The Museum's Borders Simon Knell 2020-10-08 The Museum's Borders demonstrates that museum practices are deeply entangled in border making, patrol, mitigation and erasure, and that the border lens offers a new tool for deconstructing and reconfiguring such practices. Arguing that the museum is a critical institution for the operation of knowledge-based democracies, Knell investigates how they have been used by scientists, art historians and historians to construct our bordered world. Examining the role of museums in the Windrush scandal in Britain, the exclusion of Black artists in America, ideological and propaganda discourses in Europe and China, and the remembering of contested pasts in the Balkans, Knell argues for the importance of museums in countering unethical, nationalistic, post-fact political discourse. Using the principles of Knell's 'Contemporary Museology', The Museum's Borders considers the significance of the museum for societies that wish to know and remember in ways that empower citizens and build cohesive societies. The book will be of great interest to students and academics engaged in the study of museums and heritage, art history, science studies, cultural studies, anthropology, memory studies and history. It is required reading for museum professionals seeking to adopt non-discriminatory practices.

Concept and Application of Transdisciplinarity in Intellectual Discourse and Research Hester du Plessis 2014-02-01 In the past four decades, transdisciplinarity has gained conceptual and practical traction for its transformative value in accounting for the complex challenges besetting humankind, including social relations and natural ecosystems. The need to develop frameworks for joint problem-solving involving diverse stakeholders is unquestionable. Besides generating inclusivity, which embraces academia, civil society, and policymakers in the public and private sectors, transdisciplinarity allows for the appreciation of phenomena from a multiplicity of angles and affords societies creative ways of seeking solutions to challenges that may appear intractable. This book puts forward alternatives within this arena and attempts to directly respond to the multilayered challenges of diffuse disciplines, interlinked socioeconomic problems, impacts of globalization, technological advancements, environmental concerns, food security, and more.

Edwardian House Trevor Yorke 2013 Edwardian houses, built between 1880 and 1914, remain some of our best constructed, elegant, and durable housing stock. Many were influenced by the romantic styles of Art Nouveau and the Arts and Crafts Movement. It was an age of mass production, but the pride in these homes shown by their builders is still evidenced by the dates of construction and the rural names given to them, often seen above the front door or carefully chiseled onto a plaque below the roof. This book focuses on the original exterior and interior features that would have been added by the builder but which may since have been replaced or removed. They include sash and casement windows, coloured glass, door plates and handles, letter boxes, porches, balconies, rainwater hoppers, fireplaces, stairs, wall mouldings, and fitted cupboards. A strong pride of ownership remains with today's owners. For anyone restoring features in their own Edwardian home, or who simply enjoys an admiration of period properties, then this book will be an invaluable guide. . .

International Human Rights Law and Crimes Against Women in Turkey Ayşe Güneş 2020-12-21 This book evaluates the effectiveness of current international human rights law, and in particular the recent Istanbul Convention, in eradicating so-called honour killings in Turkey. So-called 'honour killings' have become an issue of concern for the international community. In Turkey, in particular, the practice still exists despite the adoption of the relevant human rights instruments. The book argues that the improvement of the status of women in Turkey in accordance with gender equality as well as the application of the principle of state due diligence, both requirements of the Istanbul Convention and international human rights law, are fundamental means towards eradicating the killing of women in the name of 'honour'. Using feminist approaches, in particular the intersectionality approach, the study looks at the application of such standards as well as the current obstacles. Through such a lens, the study discusses the strengths and weaknesses of the Turkish Constitution, Turkish Civil Code, Turkish Penal Code and Law to Protect Family and Prevent Violence Against Women and questions the judicial approach to the implementation of the women's right to life. It identifies the lacunae in the Turkish legislation that allow inadequate legal protection for women and the inconsistency of the judicial approach to the definition of the so-called honour killings in the judgements. The study then recommends some concrete amendments to the relevant legal provisions in order to better reflect the international framework and the feminist approaches. The book will be a valuable resource for academics, researchers and policy-makers in the areas of international human rights law and feminist legal theory.
