Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Poehler, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when facing important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them to lie by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to reach their goals not only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very low-cost and their outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
