**"Rise, Ye Sea Slugs!"** Robin Gill 2003 *Rise, Ye Sea Slugs!* is a book of many faces. First, it is a book of translated haiku and contains over 900 of these short Japanese poems in the original (smoothly inserted in the main body), with phonetic and literal renditions, as well as the authors English translations and explanations. All but a dozen or two of the haiku are translated for the first time. There is an index of poets, poems and a bibliography. Second, it is a book of sea slug haiku, for all of the poems are about holothurians, which scientists prefer to call sea cucumbers. (The word cucumber is long for haiku and metaphorically unsuitable for many poems, so poetic license was taken.) With this book, the namako, as the sea cucumber is called in Japanese, becomes the most translated single subject in haiku, surpassing the harvest moon, the snow, the cuckoo, butterflies and even cherry blossoms. Third, it is a book of original haiku. While the authors original intent was to include only genuine old haiku (dating back to the 17th century), modern haiku were added and, eventually, Keigu (Gills haiku name) composed about a hundred of his own to help fill out gaps in the metaphorical museum. For many if not most modern haiku taken from the web, it is also their first time in print! Fourth, it is a book of metaphor. How may we arrange hundreds of poems on a single theme? Gill divides them into 21 main metaphors, including the Cold Sea Slug, the Mystic Sea Slug, the Helpless Sea Slug, the Slippery Sea Slug, the Silent Sea Slug, and the Melancholy Sea Slug, giving each a chapter, within which the metaphors may be further subdivided, and adds a 100 pages of Sundry Sea Slugs (scores of varieties including Monster,

Spam, Flying, Urban Myth, and Exploding). Fifth, it is a book on haiku. Editors usually select only the best haiku, but, Gill includes good and bad haiku by everyone from the 17th century haiku master to the anonymous haiku rejected in some internet contest. This is not to say all poems found were included, but that the standard was along more taxonomic or encyclopedic lines: poems that filled in a metaphorical or sub-metaphorical gap were always welcome. Also, Gill shows there is more than one type of good haiku. These are new ways to approach haiku. Sixth, it is a book on translation. There are approximately 2 translations per haiku, and some boast a dozen. These are arranged in mixed single, double and triple-column clusters which make each reading seem a different aspect of a singular, almost crystalline whole. The authors aim is to demonstrate that multiple reading (such as found in Hofstadter's *Le Ton Beau de Marot*) is not only a fun game but a bona fide method of translating, especially useful for translating poetry between exotic tongues. Seventh, it is a book of nature writing, natural history or metaphysics (in the Emersonian sense). Gill tried to compile relevant or interesting (not necessarily both) historical -- this includes the sea slug in literature, English or Japanese, and in folklore -- and scientific facts to read haiku in their light or, conversely, bring out science from haiku. Unlike most nature writers, Gill admits to doing no fieldwork, but sluggishly staying put and relying upon reports from more mobile souls. Eighth, it is a book about food symbolism. The sea cucumber is noticed by Japanese because they eat it; the eating itself involves physical difficulties (slipperiness and hardness) and pleasures from overcoming them. It is also identified with a state of mind, where you are what you eat takes on psychological dimensions not found in the food literature of the West. Ninth, it is a book about Japanese culture. Gill does not set out to explain Japan, and the sea slug itself is silent; but the collection of poems and their explanations, which include analysis by poets who responded to the author's questions as well as historical sources, take us all around the culture, from ancient myths to contemporary dreams. Tenth, it is a book about sea cucumbers. While most species of sea cucumbers are not mentioned and the coverage of the Japanese sea cucumber is sketchy from the scientific point of view, Gill does introduce this animal graced to live with no brain thanks to the smart materials comprising it and blessed for sucking in dirty sediment and pooping it out clean. Eleventh, it is a book about ambiguity. Gill admits there is much that cannot be translated, much he cannot know and much to be improved in future editions, for which purpose he advises readers to see the on-line Glosses and Errata in English and Japanese. His policy is to confide in, rather than slip by the reader unnoticed, in the manner of the invisible modern translator and allow the reader to make choices or choose to allow multiple possibilities to exist by not choosing. Twelfth, the book is the first of dozens of spin-offs from a twenty-book haiku *saijiki* (poetic almanac) called *In Praise of Olde Haiku* (IPOOH, for short) Gill hopes to finish within the decade. Thirteenth. The book is a novelty item. It has a different (often witty) header (caption) on top of each page and copious notes that are rarely academic and often humorous.

**E-Cycling: Linking Trade and Environmental Law in the EC and the U.S.** Harri Kalimo 2006-06-20 Dr. Kalimo's legal and policy analysis explores the phenomenon recycling throughout the entire product life cycle, from the extraction of raw materials, to the production and marketing

of goods, to the use of those goods and to the management of the resulting wastes. In this light, he shows how trade law interacts and can function within the demands and needs of the evolving environmental legal paradigm. Overall, the work provides more than one hundred examples of just how and when modern environmental and free trade law converge in the practical context of recycling of electronics such as mobile phones and personal computers in the internal markets of the EC and the U.S.

**Southeast Asian Affairs 2003** Daljit Singh 2003 Southeast Asian Affairs, of which there are now thirty in the series, is an annual review of significant developments and trends in the region. The contributions can be divided into two broad categories. There are those which provide an analysis of major developments during 2002 in individual Southeast Asian countries and in the region generally. Then there are the theme articles of a more specialised nature which deal with topical problems of concern.

*Tourism in the New Europe* Rhodri Thomas 2007-01-18 The book represents a state of the art review of key research on small firms in tourism in relation to European integration. It is, therefore, an essential resource for those engaged in research relating to tourism SMEs in transitional economies throughout the world. In addition, it is an essential purchase for the increasing number of students studying modules on small businesses as part of their final year undergraduate and postgraduate degree programmes. One of the key features of this book is its clear focus on breaking new ground by reporting recent research and theorising on small firms in tourism. In many cases, the analysis provided by contributors will carefully relate small business behaviour to issues of wider concern to tourism academics and policy-makers. It is also distinctive for its overt emphasis on contrasting European experiences. These characteristics contrast with the existing literature on small firms in tourism and hospitality, particularly in Europe. Previous literature achieved their aims by providing valuable syntheses of existing literature. Now that such 'taking of stock' has been undertaken, there is a demand for more overtly research-based texts that are nevertheless accessible to a wide audience. This book does exactly that.

**EPSL Frontiers** A. Halliday 2005-02-23 A new section of short reviews called 'Frontiers' was introduced within the Elsevier journal Earth and Planetary Science Letters (EPSL) in 2002 under the Editorship of Alex Halliday from ETH Zurich, Switzerland. These high profile Frontiers articles are written by leading experts and published as the opening pages to regular issues of EPSL. The reason for this development is that the Editors of EPSL believe there is an important niche to be filled with fast communications that bring the scientific community up-to-speed on interesting new areas of science. Frontiers articles are therefore specifically intended for the non-specialist earth and planetary science readership. In order to reach a broader readership, those without subscriptions to the journal, Frontiers articles will now also be published in a new book series, the EPSL Frontiers series. Volume 1 will contain all 2002 and 2003 Frontiers articles. Future volumes will contain one year of articles each.

**Buying into the Environment** Christoph Erdmenger 2017-09-08 Green purchasing - or eco-procurement - by local and central governments has long been recommended in documents such as Agenda 21 to be a key - although sometimes supplemental-ingredient in the achievement of more environmentally responsible economies. Certainly, sustainable consumption cannot be considered a realistic goal without the full engagement of public authorities. Many initiatives have been undertaken in OECD countries, most successfully in Japan and Denmark where green public purchasing has been proven to be workable and highly effective, while, in other countries, city municipalities have successfully pioneered the development of sophisticated public environmental

purchasing policies. However, for the vast majority of countries and their major cities, the potential for green public purchasing remains woefully untapped. A key question is what would be the environmental impact if the majority of cities in Europe replicated the success stories of those leading the way? Public procurement has, after all, been an important tool in achieving other public policy goals such as defence. Why should it not be used as a tool to defend the environment? The RELIEF project, funded by the EU's "City of Tomorrow and Cultural Heritage" programme was established to answer exactly this question: to define the true potential of eco-procurement and to develop a strategy for change in Europe. Buying into the Environment is the result of the research segment of the project which has now been completed. A further stage-to design a Europe-wide action plan will follow in 2004. The book, organised under the auspices of the International Council on Local Environmental Initiatives (ICLEI) analyses national approaches already tested, and provides in-depth surveys on the pioneer cities such as Hamburg, Malmo and Zurich. Serious attention is given to city-specific hurdles which have been faced and overcome. The most relevant product groups for eco-procurement such as construction, transport, energy, information technology, furniture and food. are also analysed. Uniquely, the book also provides calculations on the environmental benefits potentially achievable through greener purchasing. Tools were developed and tested by the RELIEF researchers on the environmental assessment of products, public buying power and on evaluations of market conditions in order to provide scenarios for the application of green purchasing at a European level. The conclusions are that there is huge potential for both local and central governments to adapt their behaviour patterns and purchase in a more environmentally responsible way. For example, 18% of the EU's Kyoto Protocol commitment could be achieved if major cities in the European Union purchased green electricity. The results are complemented by new ideas on how best to foster innovation in public contractual arrangements-to encourage the development of products such as super-energy-efficient computers and fuel cells-and how the legal system may require adaptation and reform. The results presented in this book will provide an indispensable resource for municipalities, governments, researchers and business practitioners looking for answers on how public procurement can have a fundamental and manifestly positive effect on the environment.

*Die ex ante Beurteilung von Positionierungsstrategien und Strategien der integrierten Kommunikation am Beispiel der KTM 990 Duke* Julia Willibald 2004-09-23

Inhaltsangabe:Zusammenfassung: Die KTM-Sportmotorcycle AG ist ein Motorradhersteller mit Sitz in Mattighofen/Österreich. KTM baut rennsporttaugliche Motorräder und hat sich durch zahlreiche Weltmeistertitel und Rallye Siege als weltweit erfolgreichste Motorradmarke im Offroad-Sport etabliert. Um das Ziel, innerhalb der nächsten fünf Jahre größter Motorradhersteller in Europa zu werden, zu erreichen, reicht allerdings ein Ausbau der weltweiten Marktführerschaft im racingorientierten Offroad-Segment nicht aus. Daher ist eine Ausdehnung der Produktpalette in Richtung sportives Straßensegment geplant. Die Markteinführung der KTM 990 Duke im Modelljahr 2005 ist deshalb von besonderer strategischer Bedeutung für die KTM-Sportmotorcycle AG, weil es sich um das erste reinrassige Zweizylinder-Straßenmotorrad der Marke KTM handelt. In weiterer Folge kommt eine V2-Supermoto auf den Markt. Im Modelljahr 2007 folgt das Superbike KTM 990 RC8. Die KTM 990 Duke bildet also die Basis für die nachhaltige Etablierung der Marke im sportorientierten Straßensegment. Da der Motorradmarkt weitgehend gesättigt und der Konkurrenzdruck sehr stark ist, ist eine aktive Gestaltung der Stellung der KTM 990 Duke auf dem Markt mittels eines ausgereiften Positionierungs- und Kommunikationskonzeptes unerlässlich. Die Positionierung wird nicht zu Unrecht als die hohe Schule des Marketing bezeichnet. Unter Positionierung versteht man die Abgrenzung des eigenen Angebots gegenüber Mitbewerberangeboten. Sie ist darauf ausgerichtet, dass ein Produkt ein eigenständiges und unverwechselbares Profil gewinnt, das für die Konsumenten attraktiv ist und in der Folge dazu führt, dass sie das Produkt den Konkurrenzprodukten vorziehen. Die Umsetzung der Positionierung

erfolgt im Rahmen der Kommunikationsstrategie. Nach Auffassung der Marketingwissenschaft und praxis ist im Kommunikationsbereich der Ansatz der integrierten Kommunikation maßgeblich. Unter integrierter Kommunikation versteht man die formale, inhaltliche und zeitliche Abstimmung der Kommunikationsmaßnahmen. Dadurch wird dem Kunden ein konsistentes Bild der Marke vermittelt und darüber hinaus können Synergieeffekte erzielt und Kostensenkungspotentiale realisiert werden. Sowohl die Positionierung als auch die integrierte Kommunikation sind aufgrund ihrer strategischen Ausrichtung und der erheblichen Investitionen mit denen die Umsetzung einer Positionierung einhergeht von großer Bedeutung für das Marketing. Die Neupositionierung [...]

*Plasminogen: Structure, Activation, and Regulation* David M. Waisman 2003-08-31  
 in this research field and the many exciting discoveries suggest that the research efforts in the next decade will reveal the mechanisms by which the components of the plasminogen system interact and regulate both plasmin activation and function at a cellular level.

Plasminogen: Structure, activation, and regulation is divided into two sections. The first section deals with the structure and regulation of plasminogen. The chapters in this section range from discussion of the structure of plasminogen and the regulation of the plasminogen gene to discussion of the structure and regulation of plasminogen activators and plasminogen activator inhibitors. Also examined is the relatively new data concerning the generation of anti-angiogenic molecules from plasminogen. The second section deals with the physiological and pathophysiological roles of plasminogen as well as the consequences of plasminogen gene knockout. Discussions in this section include examination of the role of plasminogen in hematopoietic malignancies, tumor cell progression, angiogenesis, mammary gland involution, wound healing, and bone reabsorption. xi xii

Preface In closing, I would like to thank my administrative assistant, Ms. Vi Sommerfeld, for her invaluable assistance and time-less efforts with the organization and editing of the book. Lastly, I would like to acknowledge the efforts of the authors of the individual chapters, who are authorities in this field, for agreeing to take time from busy schedules to provide these chapters in a timely fashion. **Privatization Experiences in the European Union** Marko Köthenbürger 2006 Experts evaluate the varied outcomes of privatization experiences in Austria, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain, and the UK. The trend toward privatization, which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States, has attracted the attention of policymakers over the past two decades. Privatization is broadly supported by most academic economists, but the results of actual privatization efforts seem mixed. In the UK, for example, telecom rates fell sharply after privatization, but privatized rail service was widely perceived to have declined dramatically in quality. In this CESifo volume, international experts examine the experiences of 10 EU countries, evaluating the real outcomes of privatization policies in Austria, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain, and the UK. The effects of privatization--which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation--are difficult to distinguish from the effects of other economywide influences. The studies in this volume meet this methodological challenge by using a well-defined set of criteria, including reducing consumer prices, increasing quantity, and improving quality, by which to make their assessments. Background chapters provide a conceptual framework for considering the issues. Contributors Pablo Arocena, Sean D. Barrett, Ansgar Belke, Michel Berne, Henrik Christoffersen, Andrea Goldstein, Günter Knieps, David Newbery, Martin Paldam, David Parker, Gérard Pogorel, Friedrich Schneider, Eric van Damme, Ingo Vogelsang, Johan Willner

*Internationalization of Business* Stefan Schmid 2018-12-30 This book illustrates the various facets of internationalization in managerial practice, starting with a strategic outline of the many options firms have when formulating internationalization strategies. Designed as a textbook for Bachelor, Master and MBA classrooms, the core of the book consists of six case studies on firms from diverse industries, such as sporting goods, aviation, grocery discount, motorcycle, computer and IT, and fast-food. The cases present a variety of ways of entering and operating in foreign markets, such as export, franchising, joint ventures, strategic alliances, greenfield-investments, acquisitions and mergers. In addition to market entry strategies, the cases provide readers, educators and students with insights into target market strategies, timing strategies, allocation strategies and coordination strategies of well-known companies.
