*Physics and Literature* Aura Heydenreich 2021-12-20 DIE REIHE: LITERATUR- UND NATURWISSENSCHAFTEN entsteht unter Federführung des Erlanger Forschungszentrums für Literatur- und Naturwissenschaften (ELINAS). Experten unterschiedlicher Fachkulturen führen darin ihre Methoden zusammen und fragen sowohl nach den Funktionen der Sprache in der naturwissenschaftlichen Forschung als auch nach den Verfahren der Modellierung naturwissenschaftlicher Erkenntnisse in der Literatur. Die Reihe versteht sich als ein interdisziplinäres Forum zur Reflexion der kulturellen Bedeutung natur- und literaturwissenschaftlicher Forschung sowie zur Ethik und Rhetorik wissenschaftlicher Argumentation.

*Five Faces of Modernity* Matei Călinescu 1987 *Five Faces of Modernity* is a series of semantic and cultural biographies of words that have taken on special significance in the last century and a half or so: modernity, avant-garde, decadence, kitsch, and postmodernism. The concept of modernity—the notion that we, the living, are different and somehow superior to our predecessors and that our civilization is likely to be succeeded by one even superior to ours—is a relatively recent Western invention and one whose time may already have passed, if we believe its postmodern challengers. Calinescu documents the rise of cultural modernity and, in tracing the shifting senses of the five terms under scrutiny, illustrates the intricate value judgments, conflicting orientations, and intellectual paradoxes to which it has given rise. *Five Faces of Modernity* attempts to do for the foundations of the modernist critical lexicon what earlier terminological studies have done for such complex categories as classicism, baroque, romanticism, realism, or symbolism and thereby fill a gap in literary scholarship. On another, more ambitious level, Calinescu deals at length with the larger issues, dilemmas, ideological tensions, and perplexities brought about by the assertion of modernity.

*In the Presence of the Past* R.T. Bienvenu 2013-03-11 The broad canvas covered by the articles in the present volume celebrates the diversity and richness of the writings of Frank Manuel during a scholarly career that spans over five decades. The subjects of the articles - ranging from science to utopia, from theology to political thought - mirror many of the themes Manuel has written about with erudition, flair and uncommon perception. It is only fitting that in paying tribute to such a defiant intellect each author brings to his treatment a distinct perspective and texture, the result of his own original forays into the history of ideas. Yet underlying all the essays is the conviction that the study of the intersection of individuals and ideas still yields a rich harvest. Presented to Frank on the occasion of his eightieth birthday, *In the Presence of the Past* honors a teacher, a friend and, above all, a scholar. R. T. Bienvenu and M. Feingold (eds). *In the presence of the past*. vii. MARTIN PERETZ *Frank Manuel: An Appreciation* It was finally because of Frank Edward Manuel that I decided (however belatedly) to forgo a proper academic career. Since I had not left so much as a leafscar on the tree of the scholarly culture this is not a fact which anyone else would have reason to notice. It is also not, I am happy to add, something for which Manuel will be especially remembered.

*Human Nature* David Berlinski 2019-11-04 Conventional wisdom holds that the murder rate has plummeted since the Middle Ages; humankind is growing more peaceful and enlightened; man is shortly to be much improved--better genes, better neural circuits, better biochemistry; and we are approaching a technological singularity that well may usher in utopia. *Human Nature* eviscerates these and other doctrines of a contemporary nihilism masquerading as science. In this wide-ranging work polymath David

Berlinski draws upon history, mathematics, logic, and literature to retrain our gaze on an old truth many are eager to forget: there is and will be about the human condition beauty, nobility, and moments of sublime insight, yes, but also ignorance and depravity. Men are not about to become like gods.

A Frequency Dictionary of French Deryle Lonsdale 2009-03-25 A Frequency Dictionary of French is an invaluable tool for all learners of French, providing a list of the 5000 most frequently used words in the language. Based on a 23-million-word corpus of French which includes written and spoken material both from France and overseas, this dictionary provides the user with detailed information for each of the 5000 entries, including English equivalents, a sample sentence, its English translation, usage statistics, and an indication of register variation. Users can access the top 5000 words either through the main frequency listing or through an alphabetical index. Throughout the frequency listing there are thematically-organized lists of the top words from a variety of key topics such as sports, weather, clothing, and family terms. An engaging and highly useful resource, the Frequency Dictionary of French will enable students of all levels to get the most out of their study of French vocabulary. Deryle Lonsdale is Associate Professor in the Linguistics and English Language Department at Brigham Young University (Provo, Utah). Yvon Le Bras is Associate Professor of French and Department Chair of the French and Italian Department at Brigham Young University (Provo, Utah).

The (Mis)Behaviour of Markets Benoit B. Mandelbrot 2010-10-01 This international bestseller, which foreshadowed a market crash, explains why it could happen again if we don't act now. Fractal geometry is the mathematics of roughness: how to reduce the outline of a jagged leaf or static in a computer connection to a few simple mathematical properties. With his fractal tools, Mandelbrot has got to the bottom of how financial markets really work. He finds they have a shifting sense of time and wild behaviour that makes them volatile, dangerous - and beautiful. In his models, the complex gyrations of the FTSE 100 and exchange rates can be reduced to straightforward formulae that yield a much more accurate description of the risks involved.

Minerva's Message Martin S. Staum 1996-10-17 In theory the CMPS was set up to enshrine the human and social studies that were at the heart of Enlightenment culture. Staum illustrates, however, that the Institute helped transform key ideas of the Enlightenment in order to maintain civil rights while upholding social stability, and that the social and political assumptions on which it was based affected notions of social science. He traces the careers of individual members and the factions within the Institute, arguing that the discord within the CMPS reflects the unravelling of Enlightenment culture. Minerva's Message presents a valuable overview of the intellectual life of the period and brings together new evidence about the social sciences in their nascent period.

Encyclopedia of Early Cinema Richard Abel 2005 This encyclopedia presents a wealth of information on early cinema history, with coverage of the techniques and equipment of film production, profiles of the pioneering directors and producers, analysis of individual films and the rapid growth of distinct film genres, and the emergence of something the world had never seen before - the movie star. The work also focuses on how the nature of film exhibition changed as the industry grew, and how the public's reception to films also changed. The pre-cinema period is closely examined to show those mass-cultural forms and practices - such as music hall and vaudeville - from within which cinema was to emerge. A perfect companion for any student of early cinema and film studies.

Science between Europe and Asia Feza Günergun 2010-12-09 This book explores the various historical and cultural aspects of scientific, medical and technical exchanges that occurred between central Europe and Asia. A number of papers investigate the printing, gunpowder, guncasting, shipbuilding, metallurgical and drilling technologies while others deal with mapping techniques, the adoption of written calculation and mechanical clocks as well as the use of medical techniques such as pulse taking and electrotherapy. While human mobility played a significant role in the exchange of knowledge, translating European books into local languages helped the introduction of new knowledge in mathematical, physical and natural sciences from central Europe to its periphery and to the Middle East and Asian cultures. The book argues that the process of transmission of knowledge whether theoretical or practical was not a simple and one-way process from the donor to the receiver as it is often admitted, but a multi-dimensional and complex cultural process of selection and transformation where ancient scientific and local traditions and elements. The book explores the issue from a different geopolitical perspective, namely not focusing on a singular recipient and several points of distribution, namely the metropolitan centres of science, medicine, and technology, but on regions that are both recipients and distributors and provides new perspectives based on newly investigated material for historical studies on the cross scientific exchanges between different parts of the world.

A Shared Legacy Emilia Calvo 2008 On the occasion of the 75th +1 anniversary of the publication of Prof. J. M. Millàs Vallicrosa's seminal work *Assaig d'història de les idees físiques i matemàtiques a la Catalunya medieval* by the Institut d'Estudis Catalans, the Commission on the History of Science and Technology in Islamic Societies (International Union on History and Philosophy of Science), the Grup Millàs Vallicrosa d'Història de la Ciència Àrab (Universitat de Barcelona) and the Societat Catalana d'Història de la Ciència i de la Tècnica (Institut d'Estudis Catalans) organized a conference entitled

"A Shared Legacy: Islamic Science East and West". At this conference, the Islamic Scientific Manuscripts Initiative, a new joint project for the study of manuscripts, was presented. Although the papers published in this volume deal with a mixture of subjects and disciplines - astronomical instruments, planetary models, geometry, medicine, miqat, technology and cartography - they all have the transmission of knowledge between the two shores of the Mediterranean as a common underlying thread...Amb motiu del 75è + 1 aniversari de la publicació del llibre Assaig d'història de les idees físiques i matemàtiques a la Catalunya medieval (IEC), la Commission on the History of Science and Technology in Islamic Societies (CHSTIS/IUPHS), el Grup Millàs Vallicrosa d'Història de la Ciència Àrab de la Universitat de Barcelona (UB) i la Societat Catalana d'Història de la Ciència i de la Tècnica (SCHCT) -filial de l'Institut d'Estudis Catalans- organitzaren el congrés A Shared Legacy. Islamic Science East and West (Un llegat compartit: ciència islàmica a orient i occident). Am motiu d'aquesta trobada s'han recopilat els articles que conté aquest volum tracten de temes variats -instruments astronòmics, models planetaris, geometria, medicina, tecnologia, cartografia, etc.- que tenen com a nexa en comú la transmissió del coneixement entre les dues ribes de la Mediterrània.

*Mathematicians of the World, Unite!* Guillermo Curbera 2009-02-23 This vividly illustrated history of the International Congress of Mathematicians – a meeting of mathematicians from around the world held roughly every four years – acts as a visual history of the 25 congresses held between 1897 and 2006, as well as a story of changes in the culture of mathematics over the past century. Because the congress is an international meeting, looking at its history allows us a glimpse into the effect of wars and strained relations between nations on the scientific community.

*Crossroads of Colonial Cultures* Gesine Müller 2018-04-23 The study examines cultural effects of various colonial systems of government in the Spanish- and French-speaking Caribbean in a little investigated period of transition: from the French Revolution to the abolition of slavery in Cuba (1789–1886). The comparison of cultural transfer processes by means of literary production from and about the Caribbean, embedded in a broader context of the circulation of culture and knowledge deciphers the different transculturations of European discourses in the colonies as well as the repercussions of these transculturations on the motherland's ideas of the colonial other: The loss of a culturally binding centre in the case of the Spanish colonies – in contrast to France's strong presence and binding force – is accompanied by a multirelationality which increasingly shapes hispanophone Caribbean literature and promotes the pursuit for political independence. The book provides necessary revision to the idea that the 19th-century Caribbean can only be understood as an outpost of the European metropolises. Examining the kaleidoscope of the colonial Caribbean opens new insights into the early processes of cultural globalisation and questions our established concept of a genuine western modernity. *Jewish Spain* Tabea Alexa Linhard 2014-06-04 What is meant by "Jewish Spain"? The term itself encompasses a series of historical contradictions. No single part of Spain has ever been entirely Jewish. Yet discourses about Jews informed debates on Spanish identity formation long after their 1492 expulsion. The Mediterranean world witnessed a renewed interest in Spanish-speaking Jews in the twentieth century, and it has grappled with shifting attitudes on what it meant to be Jewish and Spanish throughout the century. At the heart of this book are explorations of the contradictions that appear in different forms of cultural memory: literary texts, memoirs, oral histories, biographies, films, and heritage tourism packages. Tabea Alexa Linhard identifies depictions of the difficulties Jews faced in Spain and Northern Morocco in years past as integral to the survival strategies of Spanish Jews, who used them to make sense of the confusing and harrowing circumstances of the Spanish Civil War, the Francoist repression, and World War Two. *Jewish Spain* takes its place among other works on Muslims, Christians, and Jews by providing a comprehensive analysis of Jewish culture and presence in twentieth-century Spain, reminding us that it is impossible to understand and articulate what Spain was, is, and will be without taking into account both "Muslim Spain" and "Jewish Spain."

*Parentology* Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them

impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Tense Future Paul K. Saint-Amour 2015-03-02 We know that trauma can leave syndromes in its wake. But can the anticipation of violence be a form of violence as well? Tense Future argues that it can—that twentieth-century war technologies and practices, particularly the aerial bombing of population centers, introduced non-combatants to a coercive and traumatizing expectation. During wartime, civilians braced for the next raid; during peacetime they braced for the next war. The pre-traumatic stress they experienced permeates the century's public debates and cultural works. In a series of groundbreaking readings, Saint-Amour illustrates how air war prophets theorized the wounding power of anticipation, how archive theory changed course in war's shadow, and how speculative fiction conjured visions of a civilizational collapse that would end literacy itself. And in this book's central chapters, he shows us how Ford Madox Ford, Robert Musil, James Joyce, Virginia Woolf, and other interwar modernist writers faced the memory of one war and the prospect of another, some by pitting their fictions' encyclopedic scale and formal turbulence against total war, others by conceding war's inevitability while refusing to long for a politically regressive peace. Total war: a conflict that exempts no one, disregarding any difference between soldier and civilian. Tense Future forever alters our understanding of the concept of total war by tracing its emergence during the First World War, its incubation in air power theory between the wars, and above all its profound partiality. For total war, during most of the twentieth century, meant conflict between imperial nation states; it did not include the violence those states routinely visited on colonial subjects during peacetime. Tacking back and forth between metropole and colony, between world war and police action, Saint-Amour describes the interwar refashioning of a world system of violence-production, one that remains largely intact in our own moment of perpetual interwar.
