#### THE ROLLS-ROYCE ARMoured CAR

---

**Bloomsbury Publishing** The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

#### EVERYTHING YOU WANTED TO KNOW ABOUT THE SCIENCE OF RAISING CHILDREN BUT WERE TOO EXHAUSTED TO ASK

---

**Simon and Schuster** An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

#### THE GODS OF EDEN AND OPERATION HIGH JUMP

---

**Strategic Book Publishing & Rights Agency** One of the most amazing epic stories in recent memory, the connection between ancient alien beings and human history is captured in this mesmerizing science fiction novel. A biblical passage from the Book of Genesis points the way to this connection, which recently has been tied to new excavations in Southeast Turkey, thought by several archeologists to be the site of the fabled Garden of Eden. The story ties the ancient Jewish staff of Moses to the Knights Templars, the Bilderberg Group, the American NSA, and Israeli intelligence services, all in pursuit of the secretive German Nazi Base 211 located at the South Pole in Antarctica. The American top secret Operation High Jump, which was recently partially declassified, raises many questions about the involvement of the world's governments in a cover-up of alien presence on Earth.

### THE EGO TRICK

---

[Granta Books](#) Are you still the person who lived fifteen, ten or five years ago? Fifteen, ten or five minutes ago? Can you plan for your retirement if the you of thirty years hence is in some sense a different person? What and who is the real you? Does it remain constant over time and place, or is it something much more fragmented and fluid? Is it known to you, or are you as much a mystery to yourself as others are to you? With his usual wit, infectious curiosity and bracing scepticism, Julian Baggini sets out to answer these fundamental and unsettling questions. His fascinating quest draws on the history of philosophy, but also anthropology, sociology, psychology and neurology; he talks to theologians, priests, allegedly reincarnated Lamas, and delves into real-life cases of lost memory, personality disorders and personal transformation; and, candidly and engagingly, he describes his own experiences. After reading The Ego Trick, you will never see yourself in the same way again.

### CREATING MODERN CAPITALISM

### HOW ENTREPRENEURS, COMPANIES, AND COUNTRIES TRIUMPHED IN THREE INDUSTRIAL REVOLUTIONS

---

[Harvard University Press](#) What explains the national economic success of the United States, Britain, Germany, and Japan? What can be learned from the long-term championship performances of leading business firms in each country? How important were specific innovations by individual entrepreneurs? And in the end, what is the true nature of capitalist development? The Pulitzer Prize-winning historian Thomas K. McCraw and his coauthors present penetrating answers to these questions. Creating Modern Capitalism is the first book to explain for a broad audience the interconnections among technological innovation, management science, the power of entrepreneurship, and national economic growth. The authors approach each question from a comparative framework and with a unique triple focus on national economic systems, particular companies, and individual business leaders. Above all, the book focuses on how specific entrepreneurs influenced the economic success of their countries: Josiah Wedgwood and Henry Royce in Britain; August Thyssen and Georg von Siemens in Germany; Henry Ford, Alfred Sloan, and the two Thomas J. Watsons in the United States; Sakichi Toyoda, Masatoshi Ito, and Toshifumi Suzuki in Japan. The product of a three-year collaborative effort at the Harvard Business School, the book combines cutting-edge scholarship with a finely tuned sense of the art of management. It will engage general readers as well as those with a special interest in entrepreneurship and the evolution of national business systems.
