**Parentology Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask** *Simon and Schuster* An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time. **Foundations of Food Preparation Ainsley and Owen An Unexpected Friendship** *FriesenPress* Ainsley Apple is bored with playing in the woods near her orchard home and wants to go on an adventure. Whist uses a standard 52 playing card deck with Aces high and 2s low. The trump suit changes with each deal. The objective of whist is to be the first team or player to reach 5 pointsGameplay begins with the player to the left of the dealer, with them laying down a starter card. Going clockwise, players follow suit if possible and try to out rank the cards played. If they cannot follow suit, they then may play any of their cards. The winner of the round lays down the starter card of the next round. Before gameplay can begin, a dealer must first be chosen. To do so, each player will draw a random card from a shuffled deck. The player with the lowest card becomes the dealer. The dealer then shuffles the deck and passes out all of the cards one by one to each player. The last card is flipped over to establish the trump suit for the round. The dealer is then given that card.Get your copy today by scrolling up and clicking Buy Now to get your copy today **Bead Jewelry Making for Beginners Step-by-Step Instructions for Beautiful Designs** *Rockridge Press* Gorgeous beaded jewelry, handcrafted by you--a beginner's guide Ever seen an amazing piece of beaded jewelry and wondered how it was made? The inequality of AT accessibility has left populations such as individuals with intellectual disability (ID) behind these potential benefits. This book presents six articles that highlight the need, impact, and possibilities of AT for people with ID. With the emphasis on the multidisciplinary perspectives, the objective of the book is to facilitate a better understanding of the needs of people with ID and the potential AT influences. Ultimately, we hope this book will shed some lights on this important topic and provoke more discussions and efforts devoted to improving the lives of individuals with ID through the use of AT. **Earth Day** Pebble Books Earth Day celebrates our beautiful planet and calls us to act on its behalf.
