The Evolution of American Urban Society Howard P. Chudacoff 1981 In over three centuries of growth and change, American cities have exerted forces that have been both centrifugal -- pulling people, resources, and interest toward them -- and centripetal -- sending out goods, services, and ideas. The story of how these forces evolved over time encompasses almost every aspect of American history. Always cognizant of change over time, this book explores the ways that urban development influenced people's lives and on the ways people shaped the urban environment. A city is simultaneously a social, economic, and political entity, and Howard P. Chudacoff and Judith E. Smith have taken care to examine each of these dimensions of urban life. Their focus is on urban society: its institutions, its activities, and, especially, its people. In this, the Sixth Edition, Chudacoff and Smith pay particular attention to issues of race, ethnicity, gender, the built environment, regional differentials, and emerging cultural forms such as rock and rap music. New material has been added on the environmental impact of cities and suburbs and on the new racial and ethnic mix produced by the most recent immigration trends. In addition, the final chapter has been expanded to take into account issues relating to the presidential administration of George W. Bush and to the consequences of the terrorist attacks of September 11, 2001. Book jacket.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Riding Man Mark Gardiner 2012-07-15 For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. *Riding Man* is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.
