If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time. **Toyota Corolla/Nova 1985-98 Auto Repair Manual-Sedan, Seca, Hatch,all Engines inc 16 Val TOHC** Renniks Publications Detailed information on Corolla 4 cylinder engines vehicles 1985 to 1993 including 2A, 3A, 4A, 6A plus TOHC 4A-FE and 4A-GE engines, all transmissions, axles, suspension, brakes, body, wiring schematics, diagnostic codes, EFI and carburetor, problem solving, plus more. 4x4 model included.
