Fully illustrated sequences guide you step-by-step through a mechanical overhaul and show you how to restore bodywork, interior and electrics. Includes soft-top mechanism replacement.

Reading Pleasures National Library of Australia 2016-11 This is a little gem of a book--the perfect Christmas gift for lovers of reading! Reading Pleasures is filled with gorgeous photographs and artworks, each paired with an inspiring quotation. Book lover and host of The Book Club Jennifer Byrne introduces the book magnificently in her Foreword: 'Here are brief quotations and observations on the reading life, accompanied by illustrations from the National Library of Australia's own collection'. They 'amount to a celebration--and examination--of the

lifelong, earthy, impossible-to-explain love affair between readers and their books.' We all read in different ways: some in a private moment revelling in the escape that reading allows, or some with an eye to sharing and discussing. Tim Winton sums up reading in one word: 'privacy'. But for others, reading is company. 'As long as you have the capacity to read,' says Elliot Perlman, 'you needn't be alone any more'. Or as Richard Flanagan puts it in *The Narrow Road to the Deep North*, when his hero Dorrigo Evans stands in his library: 'he was not alone'. And Miles Franklin wonderfully describes the place we go to when we are reading as 'book-land'. To return to Jennifer: 'As the chorus of voices in this book makes clear, there are as many ways to read as there are to live.'

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Relentless Younggil An 2016-04-14 This book contains analysis of 48 games between two of the top Go players of the early 21st century, but it is not just another book of game commentaries. It is the story of the rivalry and friendship between Lee Sedol and Gu Li, their relentless struggle to become the best, and an explication of the secrets of Go hidden within their games. There are two parts to Relentless. Part One is the core of the book and examines, in unprecedented detail, the 10 game match (jubango) played by Lee Sedol and Gu Li throughout 2014. Part Two reviews every other official game between the two masters (up until the end of 2015), providing the reader with ample material to review and enjoy, while reflecting on what they learned in Part One. Rather than just saying what happened, we use the match as the basis for an extensive study of the fundamental techniques, strategies and principles of Go--all applied within the context of real games, so that the reader can see how ideas and techniques are employed in practice. Go is an art form, and like other arts, studying the work of masters contributes greatly to one's appreciation, enjoyment and gradual mastery of the craft. When you study a piece of music, the goal is rarely (if ever) just to be able to play it. Rather, a

deep study of a piece is intended to convey a visceral understanding of the technique and theory embodied within it, in a way that a book about theory never could. Relentless strives to offer that same experience to Go players. Over two years, we have distilled our knowledge and passion for the game into 625 pages of pure Go, until nothing more would fit. Where other books might gloss over the details, we have sought to expose the wealth of tactical considerations beneath the surface, so that they may be studied, applied to the reader's games, and eventually mastered. We have extracted a practical lesson from every passage of play and boiled it all down to a series of memorable proverbs (both old and new) for the reader to internalize. Relentless also draws on the knowledge of great thinkers of the past--such as Sun Zi (Sun Tzu), Lao Zi, Thucydides, Carl von Clausewitz, and many more--demonstrating how their ideas apply to Go. Finally, the commentary is honest. In the past, some books portrayed professional Go players like gods and politely overlooked small mistakes. We make no apologies for doing away with this convention. This is not intended to be the kind of book you will only read once. The content is dense in parts and may require reflection. It is our hope that it will serve readers for many years to come, however worn, as a source of knowledge and inspiration, throughout their journey along the path of Go.

Auto Repair For Dummies Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
