WRITE IT UP

PRACTICAL STRATEGIES FOR WRITING AND PUBLISHING JOURNAL ARTICLES

Amer Psychological Assn How do you write good research articles -- articles that are interesting, compelling, and easy to understand? How do you write papers that influence the field instead of falling into obscurity? Write It Up offers a practical and revealing look at how productive researchers write strong articles. The book's guiding idea is that academics should write to make an impact, not just to get something published somewhere. Your work will be more influential if you approach it reflectively and strategically. Based on his experience as an author, journal editor, and reviewer, Paul Silvia offers systematic approaches to problems like picking journals; cultivating the right tone and style; managing collaborative projects and co-authors; crafting effective Introduction, Method, Results, and Discussion sections; and submitting and resubmitting papers to journals. With its light-hearted style and practical advice, Write It Up will help graduate students struggling with writing their first paper, early career professors who need advice on how to write better articles, and seasoned academic writers looking to refresh their writing strategy or style.

HOW TO WRITE A LOT

A PRACTICAL GUIDE TO PRODUCTIVE ACADEMIC WRITING

Amer Psychological Assn All students and professors need to write, and many struggle to finish their stalled dissertations, journal articles, book chapters, or grant proposals. Writing is hard work and can be difficult to wedge into a frenetic academic schedule. In this practical, light-hearted, and encouraging book, Paul Silvia explains that writing productively does not require innate skills or special traits but specific tactics and actions. Drawing examples from his own field of psychology, he shows readers how to overcome motivational roadblocks and become prolific without sacrificing evenings, weekends, and vacations. After describing strategies for writing productively, the author gives detailed advice from the trenches on how to write, submit, revise, and resubmit articles, how to improve writing quality, and how to write and publish academic work.

ON WRITING

A MEMOIR OF THE CRAFT

Hodder & Stoughton In 1999, Stephen King began to write about his craft -- and his life. By midyear, a widely reported accident jeopardized the survival of both. And in his months of recovery, the link between writing and living became more crucial than ever. Rarely has a book on writing been so clear, so useful, and so revealing. On Writing begins with a mesmerizing account of King's childhood and his uncannily early focus on writing to tell a story. A series of vivid memories from adolescence, college, and the struggling years that led up to his first novel, Carrie, will afford readers a fresh and often very funny perspective on the formation of a writer. King next turns to the basic tools of his trade -- how to sharpen and multiply them through use, and how the writer must always have them close at hand. He takes the reader through crucial aspects of the writer's art and life, offering practical and inspiring advice on everything from plot and character development to work habits and rejection. Serialized in the New Yorker to vivid acclaim, On Writing culminates with a profoundly moving account of how King's overwhelming need to write spurred him toward recovery, and brought him back to his life. Brilliantly structured, friendly and inspiring, On Writing will empower--and entertain--everyone who reads it.

WRITE MORE, PUBLISH MORE, STRESS LESS!

FIVE KEY PRINCIPLES FOR A CREATIVE AND SUSTAINABLE SCHOLARLY PRACTICE

Stylus Publishing, LLC In this book Dr. Dannelle D. Stevens offers five key principles that will bolster your knowledge of academic writing, enable you to develop a manageable, sustainable, and even enjoyable writing practice, and, in the process, effectively increase your publication output and promote your academic career. A successful and productive book and journal article author, writing coach, creator of a nationally-recognized, cross-disciplinary faculty writing program, and with a long career as a faculty member and experience as a department chair, Dr. Stevens offers a unique combination of motivation, reflective practices, analytical tools, templates, and advice to set you on the path to being a productive and creative writer. Drawing on her experience as a writer and on her extensive research into the psychology of writing and the craft of scholarly writing, Dr. Stevens starts from the premise that most faculty have never been taught to write and that writers, both experienced and novice, frequently experience anxiety and self-doubt that erode confidence. She begins by guiding readers to understand themselves as writers and discover what has impeded or stimulated them in the past to establish positive new attitudes and sustainable habits. Dr. Stevens provides strategies for setting doable goals, organizing a more productive writing life, and demonstrates the benefits of writing groups, including offering a variety of ways in which you can experiment with collaborative practice. In addition, she offers a series of reflections, exercises, and activities to spark your writing fluency and creativity. Whether developing journal articles, book chapters, book proposals, book reviews, or conference proposals, this book will help you demystify the hidden structures and common patterns in academic writing and help you match your manuscript to the language, structures, and conventions of your discipline--be it in the sciences, social sciences, or humanities. Most importantly, believing that connecting your passions with your work is essential to stimulating your ideas and enthusiasm, this essential guide offers you the knowledge and skills to write more.

ON REVISION

THE ONLY WRITING THAT COUNTS

University of Chicago Press A trusted editor turns his attention to the most important part of writing: revision. So you've just finished writing something? Congratulations! Now revise it. Because revision is about getting from good to better, and it's only finished when you decide to stop. But where to begin? In *On Revision*, William Germano shows authors how to take on the most critical stage of writing anything: rewriting it. For more than twenty years, thousands of writers have turned to Germano for his insider's take on navigating the world of publishing. A professor, author, and veteran of the book industry, Germano knows what editors want and what writers need to know: Revising is not just correcting typos. Revising is about listening and seeing again. Revising is a rethinking of the principles from the ground up to understand why the writer is doing something, why they're going somewhere, and why they're taking the reader along with them. *On Revision* steps back to take in the big picture, showing authors how to hear their own writing voice and how to reread their work as if they didn't write it. *On Revision* will show you how to know when your writing is actually done—and, until it is, what you need to do to get it there.

THE LITERATURE REVIEW

A STEP-BY-STEP GUIDE FOR STUDENTS

SAGE Publications This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

ATOMIC HABITS

AN EASY & PROVEN WAY TO BUILD GOOD HABITS & BREAK BAD ONES

Penguin The #1 New York Times bestseller. Over 4 million copies sold! *Tiny Changes, Remarkable Results* No matter your goals, *Atomic Habits* offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change,

but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: • make time for new habits (even when life gets crazy); • overcome a lack of motivation and willpower; • design your environment to make success easier; • get back on track when you fall off course; ...and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

DEEP LEARNING

MIT Press An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. "Written by three experts in the field, Deep Learning is the only comprehensive book on the subject." —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

THE WRITING REVOLUTION

A GUIDE TO ADVANCING THINKING THROUGH WRITING IN ALL SUBJECTS AND GRADES

John Wiley & Sons "HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

THE PRODUCTIVE GRADUATE STUDENT WRITER

HOW TO MANAGE YOUR TIME, PROCESS, AND ENERGY TO WRITE YOUR RESEARCH PROPOSAL, THESIS, AND DISSERTATION AND GET PUBLISHED

Stylus Publishing, LLC This book is for graduate students--and others--who want to become more productive writers. It's especially written for those who want to: • increase their motivation, focus, and persistence to move a project to completion • overcome procrastination and perfectionistic tendencies • reduce (or write in spite of) their anxiety and fear of writing • manage their time, work, energy (and advisor) for greater productivity The process or craft of sustained writing is not a matter that's taught to undergraduate or graduate students as part of their studies, leaving most at sea about how to start a practice that is central to a career in academe and vital in many other professional occupations. This book grew out of conversations Jan Allen has held with her graduate students for over 30 years and reflects the fruit of the writing workshops and boot camps she has conducted at three universities, her own and numerous colleagues' experiences with writing and advising, as well as the feedback she receives from her popular Productive Writer listserv. While Jan Allen recognizes that writing is not an innate talent for most of us, she demonstrates that it is a process based on skills which we can identify, learn, practice and refine. She focuses both on the process and habits of writing as well as on helping you uncover what kind of writer are you, and reflect on your challenges and successes. With a light touch and an engaging sense of humor, she proposes strategies to overcome procrastination and distractions, and build a writing practice to enable you to become a more productive and prolific writer. Jan Allen proposes that you read one of her succinct chapters - each devoted to a specific strategy or writing challenge - each day, or once a week. When you find one that increases your concentration, motivation or endurance, make it a habit. Try it for two weeks, charting the resulting increased productivity. It will become part of your repertoire of writing and productivity tools to which you can progressively add.

WRITING FOR ACADEMIC JOURNALS 4E

McGraw-Hill Education (UK) This comprehensive guide to writing journal articles addresses all the stages and recurring challenges, from targeting a journal to dealing with reviewer feedback. Drawing on many years of running 'Writing for Publication' workshops, Murray explores not only style and structure but also behaviours and emotions. As a key component of both research courses and careers, this timely text also addresses the struggle to make time for high quality academic writing and how to ensure a writing-life balance. Examining a variety of approaches, relevant to many different academic disciplines, this core text demystifies and defines writing practices and makes this form of high-stakes academic writing seem manageable. Writing for journals has never been more competitive, and writers, researchers, practitioners and students need expert guidance on productive practices and ways of maintaining focus and motivation, which Murray provides. This latest edition is completely updated and more relevant than ever for clinicians, practitioners and students. "This book was already a classic, but the update makes it even more useful. From finding time to write, doing a short literature review and identifying scam journals, Rowena Murray provides an excellent, concise and accessible companion for writing academic journal papers, which is appropriate for both students and working academics." Associate Professor Inger Mewburn, Director of Research Training, The Australian National University, Australia "Rowena Murray has approached publishing in a journal with scientific rigour. Following this book's recommendations will make it impossible to find a convincing excuse for failure to publish. She herself writes with a high level of artisanal skill; this book is fast paced, stylish and highly readable. Her own extensive experience in supporting journal article writers tempers this book with the credibility of a seasoned veteran. Best of all, there is a wealth of wisdom here—in advising on how to publish, Murray is also advising on how to live a satisfying life as a writer." Associate Professor Susan Carter, University of Auckland, New Zealand "In *Writing for Academic Journals* (4th edition), Rowena Murray's voice is direct, down-to-earth and wise. Drawing on a depth of practical experience as both published author and writing teacher, she conveys the message that, yes, publishing

in academic journals is demanding, but it's also very possible. And that once you are successful, there is still much to be learned from reading books like this one and hanging out with others in writing groups and workshops. To that end, the book is a trove of tips and techniques helpful to all who pursue the challenging craft of (good) academic writing." Barbara Grant, Associate Professor in the School of Critical Studies in Education at the University of Auckland, New Zealand, and author of *Academic writing retreats: A facilitator's uide*

THEORY CONSTRUCTION AND MODEL-BUILDING SKILLS, SECOND EDITION

A PRACTICAL GUIDE FOR SOCIAL SCIENTISTS

Guilford Press This accessible, hands-on text has now been revised and updated, with expanded coverage of topics including how theory may emerge from exploratory data analysis. The book prepares graduate students, new researchers, and even seasoned investigators to develop their own theories and build on existing ones. Concrete strategies are provided to help readers generate ideas, define constructs, and think through relationships and processes that link constructs. Compelling examples from multiple disciplines illustrate the use of quantitative, qualitative, and mixed methods orientations to theory construction. The text also offers practical advice for writing effectively about theories in papers and grant applications. Readers learn by doing via application and concept exercises, demonstration boxes, and practical guidelines. The extensive companion website includes (www.theory-construction.com) PowerPoint slides of all of the book's figures, primers on advanced topics, video demonstrations, supplemental exercises, and other resources. **New to This Edition** *Emergent theory is now covered in mixed methods as well as qualitative approaches, plus in a new chapter on exploratory quantitative methods that can help generate new theory through data mining. *Chapter on whether and how to revise a theory when faced with disconfirmatory data. *Two chapters on the theoretical underpinnings of measurement practices. *New or expanded discussions of what constitutes a theoretical contribution, conceptual logic models, thought experiments, and more. **Pedagogical Features** *Application and concept exercises in every chapter. *Lists of key terms and engaging topical boxes. *Annotated suggestions for further reading. *New companion website with rich resources for students and instructors. *Chapters stand on their own and can be used in any order.

THEORY CONSTRUCTION AND MODEL-BUILDING SKILLS

A PRACTICAL GUIDE FOR SOCIAL SCIENTISTS

Guilford Publications "This book provides young scientists with tools to assist them in the practical aspects of theory construction. We take an informal journey through the cognitive heuristics, tricks of the trade, and ways of thinking that we have found to be useful in developing theories-essentially, conceptualizations-that can advance knowledge in the social sciences. This book is intended to provide the instructor with a useful source for helping students come up with ideas for research and for fine-tuning the resultant theories that emerge from such thinking. An objective of this book is to move toward a needed balance in the emphases given to theory construction and theory testing"--

THE WRITING LIFE

Harper Collins "For nonwriters, it is a glimpse into the trials and satisfactions of a life spent with words. For writers, it is a warm, rambling, conversation with a stimulating and extraordinarily talented colleague." — *Chicago Tribune* From Pulitzer Prize-winning Annie Dillard, a collection that illuminates the dedication and daring that characterizes a writer's life. In these short essays, Annie Dillard—the author of *Pilgrim at Tinker Creek* and *An American Childhood*—illuminates the dedication, absurdity, and daring that characterize the existence of a writer. A moving account of Dillard's own experiences while writing her works, *The Writing Life* offers deep insight into one of the most mysterious professions.

THE ACADEMIC WRITER

A BRIEF GUIDE

Bedford/St. Martin's The Academic Writer is a brief guide that prepares students for any college writing situation through a solid foundation in rhetorical concepts. By framing the reading and composing processes in terms of the rhetorical situation, Lisa Ede gives students the tools they need to make effective choices. With an emphasis on analysis and synthesis, and making and supporting claims, students learn to master the moves of academic writing across mediums. A new chapter on "Strategies for Multimodal Composing" and advice on writing in a multimodal environment throughout the text help instructors take students into new contexts for reading and composing. New coverage of drafting, editing, and revising, and updated coverage of academic research--including the 2016 MLA guidelines--ensures that students are supported at all stages of the writing process.

EMOTIONAL FIRST AID

HEALING REJECTION, GUILT, FAILURE, AND OTHER EVERYDAY HURTS

Penguin Prescriptive and unique, Emotional First Aid is essential reading for anyone looking to become more resilient, build self-esteem, and let go of the hurts and hang-ups that are holding them back. We all sustain emotional wounds. Failure, guilt, rejection, and loss are as much a part of life as the occasional scraped elbow. But while we typically bandage a cut or ice a sprained ankle, our first aid kit for emotional injuries is not just understocked—it's nonexistent. Fortunately, there is such a thing as mental first aid for battered emotions. Drawing on the latest scientific research and using real-life examples, practicing psychologist Guy Winch, Ph.D. offers specific step-by-step treatments that are fast, simple, and effective.

DEVELOPING RESEARCH WRITING

A HANDBOOK FOR SUPERVISORS AND ADVISORS

Routledge Developing Research Writing is designed to encourage, inspire and improve the advisory practice of providing writing feedback. This book provides insights and advice that supervisors can use to advance their support of their research students' writing and, at the same time, survive increasing supervisory demands. Book parts are framed by empirical supervisor and doctoral student experiences and chapters within each part provide multiple approaches. The carefully chosen contributors are specialists on research writing and doctoral pedagogy, who guide the reader through the key stages of providing feedback. Split into nine key parts the book covers: starting a new supervision with writing in focus; making use of other resources along the way; encouraging style through control of language; writing feedback on English as an Additional Language (EAL) writing; Master's and Honours smaller projects' writing feedback; thesis by publication or performance-based writing; maintaining and gathering momentum; keeping the examiner happy; writing feedback as nudging through identity transition. The parts cohere into a go-to handbook for developing the supervision process. Drawing on research, literature and experience, Developing Research Writing offers well-theorized, yet practical and grounded advice conducive to good practices.
